Sanskar Jain

Full-Stack Software Engineer | Java | Spring Boot | React | SQL | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-stack engineer with a **B.Tech in Computer Engineering** and **2+ years** of professional experience building **Java/Spring Boot** services, **RESTful APIs**, and **SQL** data layers, plus a production **React/TypeScript** SaaS used by **15+ organizations**. Contributes across the full lifecycle (design docs, coding, testing, **CI/CD** deployment, production support) in **Agile** teams with **Git**-based code reviews.

Technical Skills

Languages: Java 17, JavaScript (ES6+), TypeScript, SQL, Python
Backend & APIs: Spring Boot, Spring Security, Hibernate, RESTful API Design, API Versioning, GraphQL, Swagger/OpenAPI, Middleware/Filters, Microservices, Asynchronous Programming
Databases: PostgreSQL, Schema Design, Indexing, Query Optimization, Database Migrations, MongoDB, Redis
Frontend: React 18, React Hooks, TanStack React Query, Axios, Vite, TailwindCSS, HTML, CSS, Responsive UI, Reusable Components
Tools & Cloud: Git, CI/CD, Azure DevOps, Docker, Kubernetes, AWS (EKS, Lambda, SQS, SNS), Terraform CDK
Practices: Agile/Scrum, Technical Design Documents, Code Review, Unit/Integration Testing, Debugging, AI-Assisted Development (Claude Code, GitHub Copilot)

Professional Experience

Verisk Analytics Hyderabad, India
Software Engineer II Apr 2026 – Present
Software Engineer I Jul 2024 – Mar 2026
Software Engineering Intern Jan 2024 – Jun 2024

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and enabling horizontal scaling.
- Built **RESTful** and **GraphQL** APIs serving **200K+ weekly requests** with validation, error-handling middleware, and **Swagger** docs, and versioned **16 v2 endpoints** so existing clients kept working.
- Tuned **MongoDB/PostgreSQL** indexes and queries, added **Redis** caching to cut API response time by **34%**, and wrote **2 idempotent migration scripts** moving **1M+ records each** with zero downtime.
- Authored technical design documents covering service boundaries and API contracts, then took features through peer design reviews and **Git** code reviews across multiple scrum teams in **biweekly** Agile releases.
- Wrote unit and integration tests reaching **90% code coverage**, reworked **Azure DevOps CI/CD** pipelines to halve deployment time, and deployed applications to **AWS** with **CDKTF**.
- Engineered fault-tolerant **asynchronous** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff, handling **500+ messages daily**, and debugged production issues **2–3 times per year**.
- Secured **6 of 15+ platform services** on **AWS EKS** with **OAuth 2.0** and **JWT**.
- Mentored **4 junior engineers**, used **Claude Code** and **GitHub Copilot** daily while reviewing all generated code before merge, and wrote a **Python OpenAI API** agent that routes **30–50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS – Multi-Tenant Platform (Java 17, Spring Boot, React 18, TypeScript, PostgreSQL) Jul 2026 – Present

- Shipped a full-stack multi-tenant **SaaS** to production as sole engineer for **15+ client organizations**, with a **React 18** frontend in **JavaScript/TypeScript** using **Vite**, **TailwindCSS**, and **TanStack React Query** for a responsive UI.
- Implemented **Axios** interceptors for transparent **JWT** refresh and role-based access, backed by **Spring Security**, a **REST** API, and tenant isolation enforced through **Hibernate** filters.
- Modeled the **PostgreSQL** schema and a payroll engine supporting **3 salary models** with prorated rate changes and overtime, rejecting edits to finalized records with **409 Conflict**.

Expense Tracker – Microservices Application (Java, Spring Boot, React, PostgreSQL) Aug 2023 – Dec 2023

- Developed **5+ Spring Boot** microservices with **Kafka** and **PostgreSQL** plus an **HTML/CSS React** frontend of **9+ reusable components**, containerized with **Docker** and orchestrated on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 – 2024 | CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
