Sanskar Jain

Backend Software Engineer | C# / .NET | AWS
Hyderabad, India | +91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901 | github.com/your-handle

Summary

Backend engineer with 2+ years building and running .NET services on AWS at Verisk Analytics, working on the Xactimate import/export platform. Most of that time has gone into event-driven microservices, authentication and identity (OAuth 2.0, Okta, JWT), and API performance. Comfortable owning a feature from design document through production support. Outside work, built and run a multi-tenant payroll SaaS used by 15+ small businesses.

Technical Skills

Languages: C#, Java, SQL, TypeScript, Python
Backend: .NET 8 / ASP.NET Core, .NET Framework (MVC, Web API 2), REST APIs and versioning, Spring Boot
Cloud and infrastructure: AWS (EKS, Lambda, SQS, SNS, S3, ElastiCache), Docker, Kubernetes, Kong Gateway, Azure DevOps CI/CD
Data and messaging: MongoDB, PostgreSQL, Redis, Elasticsearch, Apache Kafka
Auth, observability, testing: OAuth 2.0 / OIDC, JWT, Okta, OpenTelemetry, Splunk, xUnit / NUnit

Experience

Verisk Analytics — Hyderabad, India

Software Engineer II — Apr 2026 – Present
Software Engineer I — Jul 2024 – Mar 2026

- Co-designed and built RulesRunner, a stateless .NET microservice that moved compliance checks off the client onto an SQS-backed worker, cutting user wait time from about 3 s to 0.5 s and allowing horizontal scaling.
- Built the backend for Xactimate import/export across 30+ data types using asynchronous processing, S3 presigned URLs and MongoDB. Transfers became ∼38% faster and related customer tickets fell by roughly a quarter.
- Rolled out OAuth 2.0 with Okta-issued JWTs on AWS EKS behind Kong API Gateway for 6 of the platform's 15+ services, integrating with the existing Identity Server flow.
- Migrated 4 client applications from Forms Authentication to JWT bearer auth over a shared Redis session store, adding token revocation so that logout ends the session everywhere instead of leaving tokens valid for days.
- Implemented Okta Event Hook–driven logout propagation across 4 tenants with an idempotent webhook receiver and a reconciliation poller for missed events, after confirming from the OIDC spec that Okta lacks back-channel logout.
- Designed event-driven pipelines on SQS, SNS and Lambda with idempotent consumers, retry/backoff and dead-letter queues; wrote the design docs for service boundaries, API contracts and DLQ handling.
- Added URL-based versioning across 16 v2 endpoints and Swagger/OpenAPI docs to ASP.NET Core APIs handling ∼200K requests a week.
- Cut hot-endpoint response times by ∼34% via ElastiCache caching, connection pooling and index tuning on MongoDB and PostgreSQL.
- Migrated legacy .NET Framework services (ASP.NET MVC, Web API 2) to .NET 8 and reworked the Azure DevOps pipelines with staged gates and parallel jobs, roughly halving deployment time.
- Built an internal agent on the OpenAI API that drafts and routes 30–50 Jira tickets a week; use Claude Code daily for implementation and refactoring, reviewing all generated code before merge.

Software Engineering Intern — Jan 2024 – Jun 2024

Projects

Attendance & Payroll SaaS (sole developer) | sanskar-engineers-payroll-ui.onrender.com — Jul 2026 – Present

- Multi-tenant payroll and attendance product used by 15+ small businesses, built on Spring Boot (Java 17), React + TypeScript and PostgreSQL, deployed on Render.
- Tenant isolation via a shared-schema `org_id`, Hibernate filters and query-level scoping; JWT auth with 15-minute access tokens, revocable refresh tokens and 3-role RBAC.
- Payroll engine for monthly, daily and hourly pay with prorated mid-month rate changes, overtime, advances and carry-forward; finalized records are locked against retroactive edits.

Expense Tracker — Aug – Dec 2023
Five Spring Boot microservices with Kafka and Kong API Gateway, containerized with Docker and run on Kubernetes.

Education & Certification

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 – 2024 | CGPA 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
