Sanskar Jain

Software Developer | C#/.NET | Java/Spring Boot | Microservices | REST APIs
Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Developer with **2+ years** of experience designing, developing, and maintaining enterprise-grade applications in **C#/.NET** and **Java/Spring Boot** at Verisk Analytics. Skilled in building scalable **microservices**, **REST APIs**, and event-driven systems using **design patterns**, SQL/NoSQL databases, and **Docker/Kubernetes**, with hands-on **CI/CD** and **Agile/Scrum** delivery. Actively uses **AI-assisted development tools** (Claude Code, OpenAI API) to accelerate coding, debugging, and test creation while maintaining code quality through structured review.

Technical Skills

Languages: C#, Java, Python, TypeScript, JavaScript, SQL
Backend & Frameworks: .NET 8, .NET Framework, ASP.NET Core, ASP.NET MVC, Web API 2, Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Web Services, Multithreading & Asynchronous Processing, Data Structures & Algorithms
Design & Architecture: Object-Oriented Design, Software Design Patterns (CQRS, Repository, Factory, SOLID), Event-Driven Architecture, Multi-Tenant SaaS, System Design, Technical Design Documentation
Databases: MongoDB, PostgreSQL, MySQL, Elasticsearch, Schema Design, Indexing, Query Optimization
Cloud & DevOps: Microsoft Azure, Azure DevOps Pipelines, AWS, Docker, Kubernetes, CI/CD, Terraform, Git, GitHub, Linux/CLI, OAuth 2.0/JWT/OIDC, RBAC, Secure Coding
Testing, AI & Practices: xUnit, NUnit, Test Automation, Code Review, AI-Assisted Development (Claude Code, OpenAI API), Agile/Scrum, Jira, Confluence, Swagger/OpenAPI

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **C#/.NET** microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, reducing wait time from **3000ms to 500ms (83% improvement)** while enabling horizontal scaling.
- Authored technical design documentation defining service boundaries, API contracts, and **system design** for dead-letter queue (**DLQ**) handling and event publishing patterns consumed by downstream services.
- Architected fault-tolerant, **asynchronous** event-driven pipelines with idempotent processing, retry/backoff strategies, and **AWS Lambda** consumers, sustaining **500+ production messages daily** with zero message loss.
- Built **ASP.NET Core REST APIs** serving **200K+ weekly requests**, applying **object-oriented design patterns**, structured error handling, model validation, and **Swagger/OpenAPI** documentation.
- Established **OAuth 2.0** authentication on **AWS EKS** behind Kong API Gateway for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization and **RBAC**.
- Improved API response time by **34%** through **Redis** caching, connection pooling, and **SQL/NoSQL** query optimization across **PostgreSQL** and **MongoDB**, and applied **Elasticsearch** to cut search latency.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing; managed **Git**-based branching workflows.
- Adopted **AI-assisted development** (**Claude Code**, **OpenAI API**) for feature implementation and debugging, reviewing all generated code before merge; wrote **xUnit/NUnit** tests reaching **90% code coverage**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform (Java) Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant attendance and payroll **SaaS** to production, serving **15+ client organizations**, built end-to-end as sole engineer on **Spring Boot 4** (**Java 17**), **React 18**/TypeScript, and **PostgreSQL**.
- Enforced tenant isolation with a shared-schema discriminator and **Hibernate** filters, and protected the API with **Spring Security/JWT RBAC** across **3 roles**, deploying the **Docker**-containerized backend to Render with managed PostgreSQL on Supabase.

Expense Tracker -- Java Microservices Application Aug 2023 -- Dec 2023

- Developed an expense tracking platform using **Java** and **Spring Boot** with **5+ microservices**, asynchronous **Apache Kafka** messaging, and Kong API Gateway; containerized with **Docker** and orchestrated on **Kubernetes**, simulating **1000+ transactions** for load testing.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
