Sanskar Jain

.NET Core Developer | C# & .NET 8 | Microservices & CQRS | Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

.NET Core Developer with **2+ years** building enterprise **C#/.NET 8** microservices and **ASP.NET Core** APIs, specializing in **CQRS**, **OAuth 2.0** with **Okta**, and **legacy modernization** from **.NET Framework** to **.NET 8**. Delivered an **83%** latency cut, **55%** less technical debt, and **90% code coverage** with **xUnit**, in collaborative **Agile** teams.

Technical Skills

.NET & Backend: C#, .NET 8, .NET Core, ASP.NET Core, ASP.NET Core Middleware, ASP.NET MVC, Web API 2, REST APIs, Async/Await, API Versioning, Swagger/OpenAPI
Architecture & Patterns: Microservices, CQRS, Event-Driven Architecture, Repository Pattern, Idempotency, Retry/Backoff, Dead-Letter Queues, Legacy Code Modernization, Refactoring
Security & Identity: OAuth 2.0, OpenID Connect (OIDC), Okta, JWT Bearer Authentication, Kong API Gateway, Role-Based Access Control (RBAC), Token Revocation
Database: SQL Server, T-SQL, Complex Queries, Query Optimization, Indexing, PostgreSQL, MySQL, MongoDB, Database Migrations
Testing & Quality: xUnit, NUnit, Unit Testing, Integration Testing, Code Coverage, Code Review, Debugging
Cloud & DevOps: AWS (SQS, SNS, Lambda, S3, EKS, EC2, ElastiCache), Azure DevOps, CI/CD Pipelines, Docker, Kubernetes, Terraform, Redis, Git, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Migrated legacy **.NET Framework** services (**ASP.NET MVC**, **Web API 2**) to **.NET 8**, refactoring to modern **async/await** patterns and cutting technical debt by **55%** while improving runtime performance by **30%**.
- Co-designed **RulesRunner**, a stateless **.NET** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)**, and authored the technical design for service boundaries, API contracts, and **DLQ** handling.
- Architected fault-tolerant **event-driven** pipelines on **AWS Lambda**/**SQS**/**SNS** with idempotent processing and retry/backoff, sustaining **500+ production messages daily** with zero message loss.
- Built **ASP.NET Core REST APIs** serving **200K+ weekly requests** with model validation, structured error handling, **Swagger/OpenAPI** docs, and **URL-based versioning** across **16 v2 endpoints** for backward compatibility.
- Established **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens with the existing Identity Server flow for secure cross-service authorization.
- Secured single sign-out across **4 client applications** by replacing **Forms Authentication** with **JWT bearer authentication** in the **ASP.NET** pipeline over a **Redis** session store, with dual-layer revocation shrinking the token replay window from **7 days** to **under 1 second**.
- Delivered logout propagation via **Okta Event Hooks** across **4 Okta tenants**, with an idempotent webhook receiver acknowledging in **under 3 seconds** and a reconciliation poller recovering **100%** of dropped notifications.
- Tuned database performance through **indexing** and query optimization across **MongoDB** and **PostgreSQL**, added **Redis** caching for **34%** faster API responses, and shipped **2 idempotent migration scripts** moving **1M+ records each**.
- Wrote **xUnit**/**NUnit** unit and integration tests reaching **90% code coverage**, and **mentored 4 junior engineers** through code reviews.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates and automated testing for **biweekly releases**, slashing deployment time by **50%** and build cycles by **33%**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Spring Boot, React, PostgreSQL) Jul 2026 -- Present

- Shipped a production **SaaS** for **15+ client organizations** as sole engineer, with **JWT** security, **role-based access control**, **PostgreSQL** schema design, and a business-rule payroll engine.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
