Sanskar Jain

Software Engineer — Java / Spring Boot — AWS — Scalable Cloud Services
Hyderabad, Telangana, India
9021620156 — sanskarjain0901@gmail.com — LinkedIn

Summary

Software Engineer with 2+ years of hands-on experience building reliable, secure, and high-throughput backend services in **Java/Spring Boot** on **AWS** at Verisk Analytics. Strong problem-solving skills across complex distributed systems, delivering scalable and testable code aligned to system architecture guidance in Agile teams. Collaborates closely with senior developers, product managers, and stakeholders to transform requirements into incrementally delivered product enhancements. Experienced with **MySQL/Redis** data storage, **CI/CD** automation, **Splunk** monitoring, and AI-assisted development workflows with prompt engineering.

Skills

Languages: Java 17, C#, Python, SQL
Backend & Frameworks: Spring Boot, Spring Framework, Spring Data JPA, Hibernate, REST APIs, Microservices, Event-Driven Architecture, Kafka, Design Patterns (SOLID)
Cloud: AWS (S3, SNS, SQS, EKS, ECS, Lambda, ElastiCache), Docker, Kubernetes, Terraform
Data Storage: MySQL, PostgreSQL, MongoDB, Redis, Query Optimization, Indexing
CI/CD & Tools: Git, Maven, Jenkins, Azure DevOps, Application Deployment, Swagger/OpenAPI
Monitoring & QA: Splunk, OpenTelemetry, JUnit 5, Mockito, Code Reviews, Production Support, Agile Scrum
AI Tooling: AI-Assisted Development (Claude Code), Prompt Engineering, OpenAI API Integration

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Designed **RulesRunner**, an event-driven **Java 17 / Spring Boot** microservice on **AWS** using **CQRS** and **SQS**, reducing client wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Collaborated with senior developers, product managers, and stakeholders to translate high-level requirements into testable, incrementally shipped backend features aligned to system architecture guidance.
- Built production **REST APIs** with **Spring Boot**/**Spring MVC** handling **200K+ weekly requests**, applying **SOLID** design patterns, structured error handling, input validation, and **Swagger/OpenAPI** documentation.
- Modeled and optimized relational data with **Spring Data JPA**/**Hibernate**, tuning queries and indexes across **MySQL**, **PostgreSQL**, and **MongoDB**, and improved API response time by **34%** via **Redis** caching.
- Engineered a scalable import/export pipeline for **30+ data types** on **AWS** using async processing and **S3** presigned URLs, cutting transfer time by **38%** and user-reported issues by **25%**.
- Overhauled **CI/CD** pipelines (**Jenkins**/Azure DevOps) with **Maven** builds, staged gates, and parallel jobs, cutting deployment time by **50%** and build cycles by **33%**; managed **Git**-based branching workflows.
- Adopted **Claude Code** with structured prompt engineering for day-to-day implementation, debugging, and refactoring, reviewing all AI-generated code before merge to accelerate delivery without sacrificing quality.
- Achieved **85%+** test coverage using **JUnit 5**/**Mockito**; participated in structured **code reviews** and tracked sprints in **Jira** across **Agile Scrum** boards, shipping **10+ features per quarter**.
- Provided **production support** for live services, reducing mean time to diagnose incidents by **40%** through structured logging and **Splunk** dashboards on **Docker**/**Kubernetes** deployments.

Projects

Expense Tracker – Java Spring Boot Microservices Aug 2023 – Dec 2023

- Architected **5+** independently deployable **Spring Boot** microservices with async **Kafka** messaging, modeling domain entities with **Spring Data JPA**/**Hibernate** and clean, SOLID-driven service layering.
- Containerised services with **Docker** and orchestrated with **Kubernetes**, integrating **Kong API Gateway** for routing/auth and validating end-to-end flow with **1000+** simulated transactions.

Internal Workflow Automation Agent 2025 – Present

- Built an internal automation agent using the **OpenAI API** with custom prompt engineering and orchestration to auto-create and route **Jira** tickets, reducing manual triage effort for the team.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
