Sanskar Jain

Software Engineer | Java & Spring Boot | REST APIs | AWS | Cloud-Native Services
Hyderabad, Telangana, India | +91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of experience building tested, cloud-native **REST API** services on **AWS** at Verisk Analytics, plus production **Java 17** and **Spring Boot** applications delivered end-to-end. Strong in data structures, debugging, unit and integration testing, **CI/CD**, and production support, translating architecture designs into shipped features in Agile teams. Uses **AI-assisted development** and **Spec-Driven Development** daily with careful review and validation of generated code.

Technical Skills

Languages & Fundamentals: Java 8+/17, Object-Oriented Programming, Data Structures & Algorithms, C#, Python, SQL, TypeScript, JavaScript
Java & Backend: Spring Boot, Spring Framework, Spring Security, Spring Data JPA/Hibernate, Maven, REST APIs, Microservices, Swagger/OpenAPI, .NET 8, ASP.NET Core
Testing & Quality: JUnit, xUnit, NUnit, Unit Testing, Integration Testing, Test Automation, Code Coverage, Code Review, Debugging
Cloud & DevOps: AWS (S3, SQS, SNS, Lambda, EKS, ECS, ElastiCache, CloudWatch), Terraform, Docker, Kubernetes, CI/CD, Azure DevOps Pipelines, Git, Linux/CLI
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Apache Kafka, AWS SQS/SNS
Observability & Support: Splunk, OpenTelemetry, AWS CloudWatch, Logging, Monitoring, Production Support, Incident Troubleshooting
AI & Practices: AI-Assisted Development (Claude Code, OpenAI API), Spec-Driven Development, Prompt Engineering, Agile/Scrum, SAFe, Kanban, Jira, Technical Design Documentation

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless cloud-native microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83% improvement)** while scaling horizontally.
- Built **REST APIs** serving **200K+ weekly requests** with structured error handling, model validation, and **Swagger/OpenAPI** documentation, and shipped **URL-based API versioning** across **16 v2 endpoints**.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and dead-letter queues, sustaining **500+ production messages daily** with zero message loss.
- Engineered a backend for **Xactimate's** import/export of **30+ data types** using asynchronous processing, **Amazon S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Improved API response time by **34%** with **Redis**/**ElastiCache** caching and query tuning, and optimized indexing across **MongoDB** and **PostgreSQL** by analyzing slow queries.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated testing.
- Reached **90% code coverage** with **xUnit**/**NUnit** unit and integration tests, participated in code reviews, and diagnosed production issues using **Splunk**, **OpenTelemetry**, and **CloudWatch**.
- Practiced **Spec-Driven Development** for 6+ months, using **Claude Code** for implementation, debugging, and refactoring with full review before merge, and built an **OpenAI API** agent that auto-routes **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant **SaaS** to production serving **15+ client organizations**, built end-to-end as sole engineer on **Spring Boot 4** (**Java 17**), **React 18** + **TypeScript**, and **PostgreSQL**.
- Enforced tenant isolation with **Hibernate** filters, a **ThreadLocal** tenant context, and an **AOP** aspect, and secured the **REST API** with **Spring Security**, **JWT**, and **RBAC** across **3 roles**.
- Deployed the **Docker**-containerized backend to **Render** with managed **PostgreSQL**, and automated daily attendance backfill with a **Spring @Scheduled** job.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Java Spring Boot microservices** with asynchronous **Apache Kafka** messaging, **Kong API Gateway**, and **PostgreSQL**; containerized with **Docker**, deployed on **Kubernetes**, and load-tested with **1000+ transactions**.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune, India 2020 -- 2024 | CGPA: 8.8/10
