Sanskar Jain

Software Engineer | C#/.NET, Java, SQL | Root Cause Analysis & Optimization | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with a B.Tech in Computer Engineering and **2+ years** at Verisk Analytics (an insurance and financial-services data platform) developing new features from internal and external requirements in **C#/.NET** and **Java**, and maintaining production systems through **root cause analysis**, **bug fixing**, and **code optimization**. Analytical, quality-conscious problem solver who supports business analysts and customers technically, works well in cross-functional teams, and is eager to learn new platforms and complete certification training.

Technical Skills

Languages: C#, Java, SQL, Python, TypeScript, JavaScript
Backend & Frameworks: .NET 8, .NET Framework, ASP.NET Core, ASP.NET MVC, Web API 2, Spring Boot, REST APIs, Microservices, Event-Driven Architecture, OOP, Design Patterns, Data Structures & Algorithms
Databases: PostgreSQL, MySQL, MongoDB, SQL Server, T-SQL, Query Optimization, Indexing, Data Migration
Debugging & Quality: Root Cause Analysis, Bug Fixing, Performance Tuning, Unit/Integration Testing (xUnit, NUnit), Code Review, Production Support
Cloud & Tools: AWS (EC2, EKS, Lambda, SQS, SNS, S3), Docker, Redis, Git, Azure DevOps, CI/CD, Jira, Confluence, Swagger/OpenAPI
Security & Practices: OAuth 2.0, JWT, Role-Based Access Control, Agile/Scrum, Technical Documentation, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Developed new features from internal and external requirements, authoring technical designs and co-designing **RulesRunner**, a decoupled **C#** microservice that cut client wait time from **3000ms to 500ms (83%)**, and a **30+ data type** import/export backend that cut customer-reported issues **25%**.
- Performed **root cause analysis** and **bug fixing** on live systems (2--3 production support cycles yearly), tracing failures through logs, queries, and concurrency behavior and shipping fixes in **biweekly releases**.
- Optimized code and data access by tuning **SQL**, **PostgreSQL**, and **MongoDB** indexes and adding **Redis** caching, cutting API response time **34%**; migrated legacy **.NET Framework** (**ASP.NET MVC**, **Web API 2**) services to **.NET 8** for **30%** faster runtime.
- Produced **2 production-safe migration scripts** moving **1M+ records each** with idempotent operations and backward compatibility, preserving data integrity with zero downtime.
- Provided technical assistance to business analysts and client teams through **Swagger/OpenAPI** contracts and **URL-based API versioning** across **16 v2 endpoints**, keeping existing integrations stable during migration.
- Secured services with **OAuth 2.0**/**JWT** authentication across **6 platform services** and token revocation across **4 client apps**, shrinking the post-logout replay window from **7 days to under 1 second**.
- Maintained quality with **90% code coverage**, peer **code reviews**, and **Azure DevOps CI/CD** gates (deployment time down **50%**), and mentored **4 junior engineers** as a collaborative team player.

Projects

Attendance & Payroll SaaS -- Production Web Application (Java 17, Spring Boot, React) Jul 2026 -- Present

- Shipped a multi-tenant application to **15+ client organizations**, implementing a rule-driven payroll engine for **3 salary models** with prorated rate changes and safeguards against edits to finalized records, on **PostgreSQL**.

Expense Tracker -- Transaction Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Java/Spring Boot** microservices with **PostgreSQL** persistence, validated by **1000+** simulated end-to-end transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
