Sanskar Jain

Software Engineer | Java, Security & Distributed Systems | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building distributed **Java/Spring Boot** microservices, **REST APIs**, and **authentication/authorization** features (**OAuth 2.0**, **JWT**, **Okta**) at Verisk Analytics, with end-to-end ownership through production support. Full-stack across **React** front ends and **PostgreSQL** persistence, architecting cross-platform components from design docs through code review. Treats **AI** coding assistants (**Claude Code**, **GitHub Copilot**) as engineering coworkers, has built custom multi-step **AI agent orchestration** beyond simple prompting, and critically reviews all AI-generated code before merge.

Technical Skills

Languages: Java, C#, Python, TypeScript, SQL
Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Distributed Systems, Design Patterns (CQRS, Repository, Factory)
Frontend: React, TypeScript, JavaScript, HTML, CSS
Security & Identity: OAuth 2.0, OpenID Connect, JWT, Okta, Role-Based Access Control, Session Management, Token Revocation, Webhook Security, Secure Coding, Cybersecurity Fundamentals
Messaging & Caching: Apache Kafka, AWS SQS, AWS SNS, Redis, AWS ElastiCache
Cloud & DevOps: AWS (EKS, ECS, Lambda, S3), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines, Maven, Git
Persistence: PostgreSQL, MySQL, MongoDB, Elasticsearch, Query Optimization, Schema Design
AI-Native Engineering: Claude Code, GitHub Copilot, OpenAI API Agent Orchestration, Design-Doc/Spec-Driven Development, AI-Generated Code Review

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Proposed, designed, and implemented **RulesRunner**, a stateless **Java/Spring Boot** microservice (**CQRS**, **AWS SQS**) that cut client wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling of a distributed backend.
- Built **REST**-based **Spring MVC/Spring Boot** APIs serving **200K+ weekly requests** with structured error handling, validation, and **Swagger/OpenAPI** contracts; established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+** services, integrating **Okta**-issued **JWT** tokens for cross-service **authorization**.
- Secured single sign-out across **4 client applications** by migrating legacy **Forms Authentication** to **JWT** bearer auth over a centralized **Redis** session store, adding dual-layer revocation (**JTI** blocklist + session invalidation) that shrank the post-logout replay window from **7 days to under 1 second**.
- Delivered **Okta Event Hook** logout propagation across **4 Okta tenants**, hardening webhook ingestion with an idempotent, sub-3-second-ack receiver and a reconciliation poller recovering **100%** of dropped notifications.
- Cut technical debt **55%** and improved runtime **30%** modernizing legacy **.NET Framework** services, and tuned **PostgreSQL**/**MongoDB** indexing plus **Redis** caching to cut API response time **34%**.
- Built a custom multi-step **OpenAI API** orchestration agent auto-routing **30--50 Jira tickets/week**; use **Claude Code**/**GitHub Copilot** daily as engineering coworkers, reviewing all AI-generated code before merge.

Projects

Attendance & Payroll SaaS -- Full-Stack Cross-Platform Application (Java 17, Spring Boot 4, React) Jul 2026 -- Present

- Built and operate a multi-tenant **SaaS** end to end -- **Spring Boot 4**/**Java 17** backend, **React**/**TypeScript** front end, **PostgreSQL** persistence -- serving **15+** client organizations in production as sole engineer.
- Protected the **REST API** with **Spring Security** and **JWT** -- **RBAC** across **3 roles** and revocable refresh tokens.

Expense Tracker -- Distributed Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed **5+** independently deployable, **Maven**-built **Spring Boot** microservices with asynchronous **Apache Kafka** messaging, routed through **Kong API Gateway**, plus a **React** front end of **9+** reusable components.
- Containerized services with **Docker** and orchestrated on **Kubernetes**; simulated **1000+ transactions** end-to-end for load and resilience testing.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
