Sanskar Jain

Software Engineer | Secure Full-Stack Development | AI-Assisted SDLC | Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with formal training and **2+ years** of applied experience executing standard software design, development, and technical troubleshooting for secure REST APIs and full-stack systems (**C#**, **Java**, **JavaScript**) at Verisk Analytics, analyzing large, diverse production data sets to inform design decisions with awareness of upstream/downstream system impact. Leverages enterprise-authorized **AI coding assist tools** (**Claude Code**, **GitHub Copilot**) daily for code generation, refactoring, and unit test creation, critically validating all AI-generated output through peer review, automated testing, and secure coding standards. Delivers within **Agile**/**CI-CD** pipelines with a consistent focus on **application resiliency**, **security**, and responsible handling of sensitive data.

Technical Skills

Languages: C#, Java, JavaScript, TypeScript, Python, SQL
Backend, Rules & Workflow: .NET 8, ASP.NET Core, Spring Boot, REST APIs, Microservices, Business-Rule/Workflow Engine Design (CQRS), Scheduled Jobs & Async Processing
Frontend: React 18, JavaScript, TypeScript, HTML, CSS
AI-Assisted Development: Claude Code, GitHub Copilot, OpenAI API, Prompt Engineering, Critical Evaluation & Validation of AI Output, Workflow Automation
Security & Responsible AI: OAuth 2.0, OIDC, JWT, Okta, RBAC, Secure Coding, Data Sensitivity & Secure Handling of Inputs/Outputs
Cloud, DevOps & Resiliency: AWS (EKS, ECS, Lambda, SQS, SNS, S3, ElastiCache), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines, Application Resiliency
Databases & Data Analysis: PostgreSQL, MongoDB, MySQL, Elasticsearch, Schema Design, Query Optimization, Large-Scale Data Analysis
Practices: Software Development Life Cycle (SDLC), Agile/Scrum, Git, Jira, Confluence, Swagger/OpenAPI, xUnit/NUnit, Code Review, Technical Troubleshooting

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a business-rule-style stateless microservice (**CQRS** + **AWS SQS**) executing compliance checks, cutting client wait time from **3000ms to 500ms (83%)**, authoring technical design docs (service boundaries, API contracts, **DLQ** handling) after evaluating upstream/downstream system impact.
- Built **ASP.NET Core** & **Spring Boot** REST APIs serving **200K+ weekly requests** with secure input validation, structured error handling, and **Swagger/OpenAPI** docs; shipped **16** versioned v2 endpoints for backward-compatible migration.
- Established **OAuth 2.0** authentication behind **Kong API Gateway** on **AWS EKS** and migrated legacy session auth to **JWT** bearer tokens over **Redis** with dual-layer revocation, shrinking the post-logout replay window from **7 days to under 1 second**.
- Analyzed large, diverse production data sets (slow-query logs, access patterns) to tune indexing across **PostgreSQL** & **MongoDB** and apply **Elasticsearch**, improving API response time **34%** via caching and query optimization.
- Leveraged enterprise **AI coding assist tools** (**Claude Code**, **GitHub Copilot**) daily for code generation and unit test creation, validating output via peer review and automated testing (**xUnit**/**NUnit**, **90% coverage**) before merge.
- Developed an internal workflow automation agent on the **OpenAI API** using prompt engineering and custom orchestration, auto-creating and routing **30--50 Jira tickets/week** -- applying AI-assisted automation within the SDLC toolchain to eliminate manual triage.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing, cutting deployment time **50%** and build cycles **33%** while learning and applying evolving system processes for secure, stable releases.

Projects

Attendance & Payroll SaaS -- Full-Stack Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Built a multi-tenant attendance & payroll **SaaS** end-to-end as sole engineer (**Spring Boot 4**/**Java 17**, **React 18**/**TypeScript**, **PostgreSQL**), now serving **15+ client organizations** in production.
- Implemented a business-rule payroll engine supporting **3 salary models** with prorated rate changes, overtime, and advances, guarded by validation rules that block retroactive edits to finalized records; secured the API with **Spring Security**, **JWT**, and **RBAC** across **3 roles**, deploying the **Docker**-containerized stack to production.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner -- Amazon Web Services Oct 2024
