Sanskar Jain

Java Developer | Spring Boot | Microservices | AWS | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Java developer with **2+ years** building, testing, and supporting **Spring Boot** microservices on **AWS** for the Xactimate platform at Verisk Analytics. Experienced in secure authentication (**OAuth 2.0**, **JWT**), production debugging, and code review, and in working with minimal supervision. Mentored **4** junior engineers.

Technical Skills

Languages: Java 8+, Java 17, SQL, JavaScript, TypeScript, Python, C#
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, Design Patterns (CQRS, Repository, Factory)
Security & Practices: Secure Coding, OAuth 2.0, Okta, JWT, RBAC, Unit/Integration Testing, Debugging, Code Review, Agile/Scrum, Jira
Databases & Messaging: PostgreSQL, MongoDB, Redis, Elasticsearch, AWS SQS/SNS, Query Optimization
AWS & DevOps: AWS (EKS, EC2, Lambda, S3, SQS, SNS), Docker, Kubernetes, Kong API Gateway, CI/CD, Azure DevOps Pipelines, Maven, Git
Frontend & AI Tools: React JS, HTML, CSS, GitHub Copilot, Claude Code, OpenAI API

Professional Experience

Verisk Analytics Hyderabad, India
Software Engineer II Apr 2026 -- Present
Software Engineer I Jul 2024 -- Mar 2026
Software Engineering Intern Jan 2024 -- Jun 2024

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice that moved compliance checks from the client to an **AWS SQS**-backed worker, cutting user wait time from about **3 s to 0.5 s**; wrote the design docs covering service boundaries, API contracts, and dead-letter queue handling.
- Rolled out **OAuth 2.0** with **Okta**-issued **JWTs** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+** platform services, integrating with the existing Identity Server flow.
- Migrated **4** client applications from Forms Authentication to **JWT** bearer auth over a shared **Redis** session store, adding token revocation so logout ends the session everywhere instead of leaving tokens valid for days.
- Implemented **Okta Event Hook**-driven logout propagation across **4** tenants with an idempotent webhook receiver and a reconciliation poller for missed events.
- Built the backend for Xactimate import/export across **30+** data types using asynchronous processing, **S3** presigned URLs, and **MongoDB**; transfers became **38%** faster and related customer tickets fell by roughly a quarter.
- Designed **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent consumers, retry/backoff, and dead-letter queues, handling about **500 production messages a day**.
- Versioned **16 v2 REST endpoints** with Swagger/OpenAPI docs on APIs handling **200K** requests a week, and tuned **ElastiCache**, connection pooling, and **MongoDB**/**PostgreSQL** indexes to cut hot-endpoint response times by **34%**.
- Wrote unit and integration tests reaching **90% code coverage**, reviewed code across multiple scrum teams, and handled production support **2--3 times a year**; reworked **Azure DevOps** pipelines with staged gates, roughly halving deployment time.
- Coached **4** junior engineers, and use **GitHub Copilot** and **Claude Code** daily, reviewing all generated code before merge.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Java 17, Spring Boot, React JS) Jul 2026 -- Present

- Sole developer of a payroll and attendance product used by **15+** small businesses: **Spring Boot** APIs with **JWT** (15-minute access tokens, revocable refresh tokens), 3-role **RBAC**, **Hibernate** tenant filters, and **PostgreSQL**.
- Implemented the payroll engine for monthly, daily, and hourly pay with prorated rate changes and overtime; finalized records are locked against retroactive edits.

Expense Tracker -- Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed five **Spring Boot** microservices with **Apache Kafka** and **Kong API Gateway**, containerized with **Docker** and run on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 -- 2024 | CGPA 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
