Sanskar Jain

Full Stack Software Engineer | Java & React | AWS | AI Agents | Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full Stack Software Engineer with **2+ years** owning the full **SDLC** of cloud platform services and web applications, from **database** to **React** frontend, using **Java**, **AWS**, and relational/NoSQL datastores. Built deterministic **rules-based** automation (**83%** latency cut) and an **LLM-powered agent** routing **30--50 tickets weekly**, shipping via **CI/CD** with **90% test coverage**, plus production support. Self-starter who adapts quickly.

Technical Skills

Languages: Java 11+, Java 17, Python, JavaScript, TypeScript, SQL, C#
Frontend: React 18, JavaScript, TypeScript, HTML, CSS, Vite, TanStack React Query, Axios
Backend & APIs: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, Rules Engines, Swagger/OpenAPI
AI & Automation: LLM Integration (OpenAI API), AI Agents, Prompt Engineering, Task-Driven Agent Orchestration, AI-Assisted Development (GitHub Copilot, Claude Code)
Cloud & DevOps: AWS (EC2, ECS, EKS, Lambda, S3, SQS, SNS), Docker, Kubernetes, CI/CD, Azure DevOps, Git
Datastores: PostgreSQL, MySQL (Relational); MongoDB, Elasticsearch (NoSQL); Redis, Schema Design, Query Optimization, Data Access Patterns
Practices: Unit/Integration Testing, Code Review, Agile/Scrum, Production Support, Jira

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java/Spring Boot** deterministic **rules-based** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)**, and wrote the technical design covering service boundaries, API contracts, and DLQ handling.
- Developed an internal **AI workflow automation agent** on the **OpenAI API** with prompt engineering and custom orchestration, auto-creating and routing **30--50 Jira tickets per week** and eliminating manual triage.
- Built **Java/Spring Boot REST APIs** serving **200K+ weekly requests**, with **URL-based versioning** across **16 v2 endpoints**, and engineered **Xactimate** import/export of **30+ data types** with **S3** and **MongoDB**, cutting transfer time by **38%** and customer-reported issues by **25%**.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing and retries, sustaining **500+ messages daily** with zero message loss.
- Tuned **PostgreSQL/MongoDB** indexing, applied **Elasticsearch** for faster search, added **Redis** caching (**34%** faster APIs); shipped **2 idempotent migration scripts** moving **1M+ records each** with zero downtime.
- Deployed **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services** and ran services on **AWS EC2**; provided **production support 2--3 times per year**, diagnosing and resolving live incidents.
- Overhauled **Azure DevOps CI/CD** pipelines, slashing deployment time by **50%**, shipped in **biweekly releases**, and migrated legacy services to modern async patterns, cutting technical debt by **55%**.
- Wrote unit and integration tests reaching **90% code coverage**, and used **GitHub Copilot** and **Claude Code** daily to speed up development, reviewing all generated code before merge.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Platform (Java 17, Spring Boot, React, TypeScript) Jul 2026 -- Present

- Owned the full **SDLC** as sole engineer, designing, building, testing, deploying, and supporting a production **SaaS** for **15+ client organizations** across **PostgreSQL**, **Spring Boot REST APIs**, and a **React 18/TypeScript** frontend with **JWT** auth and role-based access.
- Implemented a **rules-based payroll engine** supporting **3 salary models** with prorated rates, overtime, and advances, and deployed **Docker** services.

Expense Tracker -- Microservices Application (Java, Spring Boot, Kafka, React) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Apache Kafka** and **PostgreSQL**, plus a **React** frontend of **9+** reusable **JavaScript** components; containerized with **Docker** and orchestrated on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
