Sanskar Jain

.NET Developer | Cloud & Application Security | C# / ASP.NET MVC | SQL Server
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

.NET developer with 2+ years building secure, cloud-native applications and REST APIs using **C#**, **ASP.NET Core MVC**, and **SQL**-backed data systems at Verisk Analytics. Hands-on experience enforcing **compliance and regulatory rule checks** in production, implementing **OAuth 2.0/JWT** authentication and API gateway security, and deploying on **AWS** cloud infrastructure. Strong background in troubleshooting production issues, optimising performance/scalability, and maintaining clear technical documentation within Agile teams.

Skills

Languages & Web: C#, JavaScript, TypeScript, HTML/CSS, JSON
Frameworks: .NET 8, ASP.NET Core MVC, Web API, REST APIs, Microservices, Kafka, Redis
Security: OAuth 2.0, JWT, Okta, Kong API Gateway, Input Validation, Secure API Design
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, Lambda, ElastiCache), Docker, Kubernetes, Terraform, CI/CD
Databases: SQL Server, T-SQL, PostgreSQL, MySQL, MongoDB, Stored Procedures, Query Optimisation
Tools & Practices: Azure DevOps, Git, Swagger/OpenAPI, Splunk, OpenTelemetry, Agile/Scrum, Code Reviews

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless microservice enforcing **compliance and regulatory rule checks** using **CQRS** and **SQS**, reducing wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong Gateway**, integrating **Okta JWT** tokens with existing Identity Server flow to secure cross-service authorization and protect sensitive data in transit.
- Built **ASP.NET Core MVC** REST APIs handling **200K+ weekly requests** with structured error handling, strict input validation, and **Swagger/OpenAPI**-documented contracts to reduce security and integration risk.
- Engineered a scalable import/export backend for **Xactimate** across **30+ data types** using async processing, **S3 pre-signed URLs**, and **SQL**-backed pipelines, cutting transfer time by **38%** and issues by **25%**.
- Authored production-safe, **idempotent database migration scripts** with backward compatibility on **SQL Server/PostgreSQL** enabling zero-downtime deployments in a regulated production environment.
- Improved API response time by **34%** via **Redis/ElastiCache** caching, connection pooling, and **T-SQL** query optimisation, directly improving application performance and scalability.
- Instrumented services with **OpenTelemetry** tracing and **Splunk** dashboards, reducing mean time to diagnose production incidents and troubleshoot live application issues.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing.
- Cut technical debt by **55%** and improved runtime performance by **30%** by migrating legacy services to **.NET 8** with modern async patterns and dependency injection.
- Authored technical design documentation defining service boundaries, API contracts, and event-publishing patterns; led **peer code reviews** covering security, edge cases, and production readiness.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
C#, Spring Boot, React, Docker, Kubernetes, Kong Gateway

- Built a full-stack application with **5+ microservices**, a **React** UI consuming **REST/JSON** APIs, and **Kong API Gateway** for routing, load balancing, and auth.
- Containerised all services with **Docker** and orchestrated deployments using **Kubernetes**; simulated **1000+ transactions** end-to-end for load testing.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 | CGPA: 8.8
