Sanskar Jain

Software Engineer | C#/.NET, Java, SQL | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with a B.Tech in Computer Engineering and **2+ years** at Verisk Analytics creating, coding, debugging, and maintaining production applications in **C#/.NET** and **Java** backed by **SQL** databases. Analyzes existing applications, writes specifications and test plans, keeps application documentation current, and troubleshoots and supports live systems for business users, with **secure coding** practices (**OAuth 2.0**, **JWT**) suited to payment-sensitive environments.

Technical Skills

Languages: C#, Java, SQL, JavaScript, TypeScript, Python, HTML, CSS
.NET & Backend: .NET 8, .NET Framework, ASP.NET Core, ASP.NET MVC, Web API 2, Spring Boot, REST APIs, Microservices, OOP, Design Patterns, Data Structures & Algorithms
Databases: SQL Server, T-SQL, PostgreSQL, MySQL, MongoDB, Query Optimization, Database Migrations
Web Application Tools: Atlassian Jira, Confluence, Maven, Git, Azure DevOps, CI/CD, Swagger/OpenAPI, React, JavaScript
Security: Secure Coding, OAuth 2.0, JWT, Role-Based Access Control, Session Management, Token Revocation
Quality & Practices: Unit/Integration Testing (xUnit, NUnit), Test Plans, Technical Documentation, Code Review, Troubleshooting & Production Support, Agile/Scrum

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Created and delivered **C#/ASP.NET Core** REST APIs serving **200K+ weekly requests**, with model validation, structured error handling, and **Swagger/OpenAPI** documentation maintained across the application life cycle.
- Analyzed existing applications and formulated logic for new ones, co-designing **RulesRunner**, a decoupled **C#** microservice that cut client wait time from **3000ms to 500ms (83%)**, and authoring technical specifications and API contracts before coding.
- Debugged and maintained legacy **.NET Framework** applications (**ASP.NET MVC**, **Web API 2**), then migrated them to **.NET 8**, cutting technical debt **55%** and improving runtime performance **30%**.
- Wrote **SQL** queries and tuned indexing on **PostgreSQL** and **MongoDB**, adding **Redis** caching to cut API response time **34%**, and produced **2 migration scripts** moving **1M+ records each** with zero downtime.
- Strengthened application security with **OAuth 2.0**/**JWT** authentication across **6 platform services** and dual-layer token revocation across **4 client apps**, shrinking the post-logout replay window from **7 days to under 1 second**.
- Troubleshot and supported live systems for business users (2--3 production support cycles yearly, **biweekly releases**), working from **Jira** tickets and writing unit and integration tests (**xUnit**/**NUnit**) to reach **90% coverage**.
- Followed team standards through peer **code reviews** and mentored **4 junior engineers**; automated **Azure DevOps CI/CD** pipelines to cut deployment time **50%**.

Projects

Expense Tracker -- Transaction Microservices Application Aug 2023 -- Dec 2023
Java, Spring Boot, Maven, JavaScript, PostgreSQL, Docker

- Developed **5+ Java**/**Spring Boot** microservices built with **Maven**, with **PostgreSQL** transactional persistence and a **JavaScript** UI, validated by **1000+** simulated end-to-end transactions.

Attendance & Payroll SaaS -- Production Web Application Jul 2026 -- Present
Java, Spring Boot, React, TypeScript, PostgreSQL, Docker

- Shipped a multi-tenant payroll application used by **15+ client organizations**, implementing **3 salary models** with calculation rules, **JWT** security with role-based access, and guards against edits to finalized records.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
