Sanskar Jain

Java Software Engineer | Spring Boot, REST APIs, SQL, Multithreading | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Java Software Engineer with **2+ years** designing, coding, testing, and debugging commercial-grade **Java/Spring Boot** services and **REST** APIs (**JSON**) backed by **SQL** databases, with strong **object-oriented** design, **multithreading**, and **Collections** fundamentals. Translates business requirements into technical specifications, follows secure coding, **unit testing**, and documentation standards, and troubleshoots production issues across the full **SDLC** in **Agile** teams.

Technical Skills

Languages & Core Java: Java 8+, Java 17, Object-Oriented Programming, Multithreading & Concurrency, Collections, Data Structures & Algorithms, SQL, C#, Python, JavaScript
Frameworks & Services: Spring Framework, Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, JSON, Web Services, Microservices, Design Patterns (Factory, Repository, CQRS)
Databases: PostgreSQL, MySQL, MongoDB, SQL, Schema Design, Query Optimization, Indexing, Database Migrations
Build & Platforms: Maven, Git, GitHub, Linux/CLI, Docker, AWS (EC2, EKS, Lambda, S3), CI/CD, Azure DevOps Pipelines
Quality & Security: Unit & Integration Testing (xUnit, NUnit), Code Review, Secure Coding, OAuth 2.0, JWT, Role-Based Access Control, Technical Documentation
Practices: Agile/Scrum, SDLC, Troubleshooting & Production Support, Swagger/OpenAPI, Jira, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Analyzed business requirements and authored technical design documents defining service boundaries, API contracts, and error handling, then co-designed **RulesRunner**, a stateless **Java/Spring Boot** microservice that cut client wait time from **3000ms to 500ms (83%)**.
- Built **Spring Boot REST** APIs exchanging **JSON** and serving **200K+ weekly requests**, applying **object-oriented** design, **SOLID** principles, validation, structured error handling, and **Swagger/OpenAPI** documentation.
- Resolved **multithreading** and concurrency issues in production services, using thread-safe design, locking, and asynchronous processing to keep high-volume pipelines reliable at **500+ messages daily** with zero message loss.
- Wrote **SQL**, tuned indexes and queries across **PostgreSQL** and **MongoDB**, and added **Redis** caching to cut API response time **34%**; produced **2 migration scripts** moving **1M+ records each** with zero downtime.
- Strengthened application security with **OAuth 2.0/JWT** authentication on **AWS EKS** for **6 platform services** and token revocation across **4 client apps**, following secure coding standards and code review gates.
- Reached **90% code coverage** with unit and integration tests, solved **500+** data structure and algorithm problems, and handled production issues (2--3 support cycles yearly) alongside **biweekly releases**.
- Overhauled **Azure DevOps CI/CD** pipelines to cut deployment time **50%**, and mentored **4 junior engineers** on code, testing, and documentation practices.

Projects

Attendance & Payroll SaaS -- Full-Stack Production Product (Java 17, Spring Boot, React) Jul 2026 -- Present

- Defined requirements, wrote specifications, and shipped a multi-tenant **Spring Boot/Java 17** application with **React** UI and **PostgreSQL** to **15+ client organizations**, secured with **Spring Security/JWT**, built with **Maven**, and deployed via **Docker**.

Expense Tracker -- Spring Boot Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Java/Spring Boot** microservices with **REST/JSON** APIs and **PostgreSQL** persistence, validated by **1000+** simulated end-to-end transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
