Sanskar Jain

Full-Stack Software Engineer | Java | React | SQL | REST APIs | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-stack software engineer with **2+ years** of professional experience plus a production **React/TypeScript** SaaS, building high-performance **Java/Spring Boot** backend services, **RESTful APIs**, and responsive user interfaces on **SQL** databases. Translates requirements into technical specifications, writes unit and integration tests, and ships features through code reviews in cross-functional **Agile** teams.

Technical Skills

Languages: Java 17, JavaScript (ES6+), TypeScript, SQL, C#, Python
Frontend: React 18, State Management, Component Lifecycle, React Hooks, TanStack React Query, Axios, Vite, TailwindCSS, HTML, CSS, Responsive UI
Backend & APIs: Spring Boot, Spring Security, Spring Data JPA/Hibernate, RESTful API Design, API Versioning, GraphQL, Asynchronous Programming, Middleware/Filters, Microservices, Swagger/OpenAPI
SQL & Databases: PostgreSQL, MySQL, Complex Queries, Schema Design, Indexing, Query Optimization, Database Migrations, MongoDB, Redis, Elasticsearch
Testing, Cloud & CI/CD: Unit/Integration Testing, xUnit, NUnit, AWS (EKS, EC2, Lambda, S3, SQS, SNS), Docker, Kubernetes, CI/CD, Azure DevOps, Git, Linux/CLI
Practices: Agile/Scrum, Technical Design Documents, Code Review, Troubleshooting, AI-Assisted Development (Claude Code, GitHub Copilot)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and enabling horizontal scaling.
- Analyzed requirements and authored technical design documents defining service boundaries, API contracts, and event publishing, then delivered features through peer design and code reviews in **biweekly** Agile releases.
- Built **RESTful** and **GraphQL** APIs serving **200K+ weekly requests** with validation, error-handling middleware, and **Swagger** documentation, and versioned **16 v2 endpoints** so existing clients kept working.
- Tuned **MongoDB/PostgreSQL** indexes and queries, added **Redis** caching to cut API response time by **34%**, and produced **2 idempotent migration scripts** moving **1M+ records each** with zero downtime.
- Architected fault-tolerant **asynchronous** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff, sustaining **500+ messages daily** with zero message loss, and troubleshot production issues **2--3 times per year**.
- Wrote unit and integration tests reaching **90% code coverage** and overhauled **Azure DevOps CI/CD** pipelines, slashing deployment time by **50%**, while securing **6 of 15+ platform services** with **OAuth 2.0** and **JWT**.
- Mentored **4 junior engineers**, used **Claude Code** and **GitHub Copilot** daily while reviewing all generated code before merge, and built an **OpenAI API** agent auto-routing **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Java 17, Spring Boot, React 18, TypeScript, PostgreSQL) Jul 2026 -- Present

- Shipped a full-stack multi-tenant **SaaS** to production as sole engineer, serving **15+ client organizations**, with a **React 18/TypeScript** frontend built on **Vite**, **TailwindCSS**, and **TanStack React Query** for server-state caching and responsive UI.
- Implemented **Axios** interceptors for transparent **JWT** refresh and role-based UI/API access, backed by **Spring Security** and a **REST** API with tenant isolation enforced by **Hibernate** filters.
- Designed the **PostgreSQL** schema and a payroll engine supporting **3 salary models** with prorated rate changes and overtime, rejecting edits to finalized records with **409 Conflict**.

Expense Tracker -- Microservices Application (Java, Spring Boot, React, PostgreSQL) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Kafka** and **PostgreSQL** plus a **React** frontend of **9+ reusable components**, containerized with **Docker** and orchestrated on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
