Sanskar Jain

Software Engineer | Java & Spring Boot | REST APIs | AWS | Microservices
Hyderabad, Telangana, India | +91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of experience building and operating REST APIs and microservices on **AWS** at Verisk Analytics, plus production **Java 17** and **Spring Boot** systems delivered end-to-end as a sole engineer. Skilled in unit and integration testing, **CI/CD**, **Terraform**, and **React**, with a record of cutting latency by **83%**, serving **200K+ weekly API requests**, and halving deployment time. Works independently from technical specifications and design documents, and ramps quickly on new technologies in **Agile/Scrum** teams.

Technical Skills

Languages: Java 8+/17, C#, Python, TypeScript, JavaScript, SQL
Java & Backend: Spring Boot, Spring Framework, Spring Security, Spring Data JPA/Hibernate, Maven, REST APIs, Microservices, ASP.NET Core, .NET 8, Swagger/OpenAPI, API Versioning
Testing: JUnit, xUnit, NUnit, Unit Testing, Integration Testing, Test Automation, Code Coverage
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, ECS, Lambda, ElastiCache, CloudWatch), Terraform, Docker, Kubernetes, CI/CD, Azure DevOps Pipelines, Git
Frontend: React 18, TypeScript, Vite, TailwindCSS, HTML, CSS
Messaging, Data & Caching: Apache Kafka, AWS SQS/SNS, Redis, PostgreSQL, MongoDB, MySQL, Elasticsearch
Security & Practices: OAuth 2.0, OIDC, JWT, Okta, Kong API Gateway, RBAC, Agile/Scrum, Code Review, Technical Design Documentation, Jira, Confluence

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Built **REST APIs** serving **200K+ weekly requests** with structured error handling, model validation, and **Swagger/OpenAPI** documentation, and implemented **URL-based API versioning** across **16 v2 endpoints** for backward compatibility.
- Co-designed **RulesRunner**, a stateless microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83% improvement)**.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and dead-letter queues, sustaining **500+ production messages daily** with zero message loss.
- Engineered a backend for **Xactimate's** import/export of **30+ data types** using asynchronous processing, **Amazon S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated testing.
- Improved API response time by **34%** through **Redis**/**ElastiCache** caching, connection pooling, and query tuning; cut technical debt by **55%** migrating legacy **.NET Framework** services to **.NET 8**.
- Reached **90% code coverage** with **xUnit**/**NUnit** unit and integration tests, and authored technical design documents (service boundaries, API contracts, DLQ handling) for cross-team alignment.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant **SaaS** to production serving **15+ client organizations**, built end-to-end as sole engineer on **Spring Boot 4** (**Java 17**), **React 18** + **TypeScript**, and **PostgreSQL**.
- Enforced tenant isolation with a shared-schema `org_id` discriminator, **Hibernate** filters driven by a **ThreadLocal** tenant context, and an **AOP** aspect, preventing cross-tenant data access.
- Secured the **REST API** with **Spring Security** and **JWT** (15-minute access tokens, revocable 7-day refresh tokens) and **role-based access control** across **3 roles** via `@PreAuthorize`.
- Designed a payroll engine supporting **3 salary models** with proration, overtime, and advances, and deployed the **Docker**-containerized backend to **Render** with **Spring @Scheduled** jobs for daily attendance backfill.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Java Spring Boot microservices** with asynchronous **Apache Kafka** messaging, **Kong API Gateway**, a **React** frontend of **9+ components**, and **PostgreSQL**; deployed with **Docker** and **Kubernetes** and load-tested with **1000+ transactions**.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune, India 2020 -- 2024 | CGPA: 8.8/10
