Sanskar Jain

Software Engineer | Data Engineering & Cloud Development | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building cloud-native data-processing and event-driven systems at Verisk Analytics, using **Java**, **Python**, **AWS**, **Kubernetes**, **Docker**, and **CI/CD**. Experienced with **message queues**, **NoSQL**, **Elasticsearch**, **Kafka**, and an **agentic AI** workflow on the **OpenAI API**, with strong analytical and problem-solving skills.

Technical Skills

Languages & Frameworks: Java 17, Python, SQL, PowerShell, TypeScript, Spring Boot, React
Streaming & Messaging: Apache Kafka, AWS SQS, AWS SNS, Event-Driven Architecture, Distributed Systems
Data Stores & Search: MongoDB, PostgreSQL, Elasticsearch, Redis, Amazon S3
Cloud & DevOps: AWS (EKS, EC2, Lambda, S3, CloudWatch), Docker, Kubernetes, Istio, CDKTF, Azure DevOps CI/CD
AI & Visualization: OpenAI API, Agentic AI, MCP Servers, Claude Code, GitHub Copilot, Streamlit
Security & Practices: OAuth 2.0, JWT, Okta, Kong API Gateway, RBAC, Microservices, REST APIs, CQRS, Mentoring, Agile/Scrum

Professional Experience

Verisk Analytics | **Software Engineer II** Jan 2024 -- Present, Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java/Spring Boot** microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, reducing wait time from **3000ms to 500ms (83% improvement)** and enabling horizontal scaling.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and dead-letter queues, sustaining **500+ production messages daily** with zero message loss.
- Engineered an asynchronous data import/export backend for **30+ data types** using **Amazon S3** presigned URLs and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Accelerated search and query performance by tuning **MongoDB** and **PostgreSQL** indexes, applying **Elasticsearch** to high-volume datasets, and adding **Redis** caching that cut API response time **34%**.
- Built **REST APIs** serving **200K+ weekly requests** with **Swagger/OpenAPI** documentation and **URL-based versioning** across **16 v2 endpoints**, preserving backward compatibility for existing clients.
- Produced **2 idempotent migration scripts** moving **1M+ records each** with backward compatibility, enabling zero-downtime deployments.
- Deployed production services in **Docker** containers on **AWS EKS** (**Kubernetes**, **Istio**) across **two regions**, provisioning infrastructure as code with **CDKTF** (Terraform CDK).
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, **PowerShell** scripting, and automated testing, cutting deployment time **50%** and build cycles **33%**.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens, and secured single sign-out across **4 client applications** with a **Redis** session store and token revocation.
- Developed a **Python** workflow automation agent on the **OpenAI API** with custom orchestration that auto-creates and routes **30--50 Jira tickets weekly**, and worked with **MCP servers** (Atlassian, Splunk, Dynatrace).
- Monitored services with **CloudWatch** and **Splunk** alerts and metrics, handled production support and root-cause analysis, and reviewed all **Claude Code** and **GitHub Copilot** output before merge with **90% test coverage**.
- Mentored **4 junior engineers** via code reviews and design docs in **Agile/Scrum** teams with biweekly releases.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present

- Shipped a multi-tenant **SaaS** serving **15+ client organizations** as sole engineer on **Spring Boot** (**Java 17**), **React**, and **PostgreSQL**, secured with **Spring Security**, **JWT**, and **Docker**-based deployment to **Render**.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Connected **5+ Spring Boot** microservices with asynchronous **Apache Kafka** messaging and **PostgreSQL** persistence, containerized with **Docker**, orchestrated on **Kubernetes**, and routed through **Kong API Gateway**; validated with **1000+** simulated transactions.

Stock Recommendation and Prediction Apr 2022 -- Jun 2022

- Built a **Python** pipeline from Yahoo Finance into **Firebase** with **LSTM** predictions shown in a **Streamlit** dashboard.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
