Sanskar Jain

Full Stack Engineer | React.js & TypeScript | Backend APIs | GenAI | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full Stack Engineer with **2+ years** owning features end to end: **React.js/TypeScript** UIs, scalable **REST APIs**, database tuning, and **AWS/Docker/Kubernetes** deployment, using clean architecture and **SOLID** principles. Builds GenAI-enabled workflows on the **OpenAI API** and uses **Claude Code** and **GitHub Copilot** daily, validating all AI output before release.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, TanStack React Query, Vite, TailwindCSS, Axios, HTML5, CSS3, Responsive UI, Component Architecture
Backend: C#, .NET 8, ASP.NET Core, Java, Spring Boot, Python, REST APIs, GraphQL, Microservices, Event-Driven Architecture, Clean Architecture, SOLID, CQRS
GenAI: OpenAI API, LLM Integration, Prompt Engineering, AI Agent Orchestration, Claude Code, GitHub Copilot
Databases & Caching: PostgreSQL, MongoDB, MySQL, Elasticsearch, Redis, Schema Design, Indexing, Query Optimization, Apache Kafka, AWS SQS/SNS
Cloud & DevOps: AWS (EKS, ECS, EC2, Lambda, S3), Docker, Kubernetes, Terraform, CDKTF, CI/CD, Azure DevOps Pipelines, Git
Security & Practices: OAuth 2.0, JWT, Okta, RBAC, Secure Coding, OpenTelemetry, Logging, Unit/Integration Testing (xUnit/NUnit), Code Review, Agile/Scrum, Jira

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **.NET 8** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and documenting service boundaries and API contracts for consuming teams.
- Architected resilient **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff strategies, sustaining **500+ messages daily** with zero message loss under failure conditions.
- Built **ASP.NET Core REST APIs** serving **200K+ weekly requests** (**16 v2 endpoints**) and **GraphQL** APIs, and integrated **OpenTelemetry** for tracing and observability.
- Optimized database performance by analyzing slow queries, tuning **MongoDB/PostgreSQL** indexes, adding **Redis** caching (**34%** faster APIs), and running **2 idempotent migrations** over **1M+ records each**.
- Secured services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, and cut post-logout token replay from up to **7 days** to **under 1 second** using **JWT** revocation on **Redis**.
- Developed an internal **GenAI** workflow agent on the **OpenAI API** with prompt design and custom orchestration, auto-creating and routing **30--50 Jira tickets per week**, and used **Claude Code** and **GitHub Copilot** daily for implementation, debugging, and tests, reviewing all AI output before merge.
- Wrote unit and integration tests reaching **90% code coverage** and overhauled **Azure DevOps CI/CD** pipelines for **biweekly releases**, slashing deployment time by **50%**.
- Deployed multiple applications to **AWS** production as infrastructure as code with **Terraform CDK (CDKTF)**, and resolved production incidents **2--3 times per year**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (React 18, TypeScript, Spring Boot) Jul 2026 -- Present

- Owned a multi-tenant **SaaS** end to end as sole engineer -- UI/UX implementation, backend integration, testing, and deployment -- serving **15+ client organizations** in production.
- Built the responsive **React 18/TypeScript** frontend with **Vite**, **TailwindCSS**, and **TanStack React Query** for server-state management, plus **Axios** interceptors for transparent **JWT** token refresh.
- Built **Spring Boot** APIs with **Spring Security**, role-based access control across **3 roles**, tenant isolation via **Hibernate** filters, deployed with **Docker**.

Expense Tracker -- Microservices Application (React, Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed a **React** UI of **9+** reusable components in **JavaScript**, backed by **5+ Spring Boot** microservices, **Apache Kafka** messaging, and **PostgreSQL**; deployed on **Docker/Kubernetes** and load-tested with **1000+ transactions**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
