Sanskar Jain

Backend Software Engineer | C#/.NET | Java | Distributed Systems | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Backend engineer with **2+ years** at Verisk Analytics owning scalable web services and event-driven systems for the **Xactimate** product in **C#/.NET 8** and **Java**. Cut latency by **83%**, served **200K+ weekly requests**, with strong **DSA** (**500+ LeetCode**), **multithreading**, and daily **agentic development** using **Claude Code**.

Technical Skills

Languages & Frameworks: C#, .NET 8, ASP.NET Core, Web API, Java, Spring Boot, Python, SQL, REST APIs, Microservices, Design Patterns (CQRS, Repository, Factory)
Fundamentals: Data Structures, Algorithms (500+ LeetCode Problems), Multithreading & Concurrency (Task Parallel Library, async/await, locks, thread-safe design, concurrency debugging), OOD
Databases: MongoDB, PostgreSQL, MySQL, Elasticsearch, Query Optimization, Indexing, Schema Design, Data Migration
Distributed Systems & Cloud: AWS (S3, SQS, SNS, Lambda, EKS, ElastiCache), Kafka, Redis, Event-Driven Architecture, Docker, Kubernetes, Terraform, CI/CD, Azure DevOps
Performance, Testing & Security: Performance Tuning, Caching, Unit/Integration/Automation Testing (xUnit, NUnit), OAuth 2.0, JWT, Okta, Secure Coding, Code Review
AI-Assisted Development: Claude Code, GitHub Copilot, OpenAI API, Agent Orchestration

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Architected **RulesRunner**, a stateless, event-driven microservice on **CQRS** and **AWS SQS/SNS** that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83%)** and sustaining **500+ production messages daily** with idempotent retries and dead-letter queues.
- Built **ASP.NET Core** web services handling **200K+ weekly requests** with **Swagger/OpenAPI** docs, and shipped **URL-based versioning** across **16 v2 endpoints** for backward-compatible client migration.
- Engineered an asynchronous import/export backend for **30+ data types** using **Amazon S3** presigned URLs and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Tuned hot-path endpoints with **Redis/ElastiCache** caching and slow-query analysis, improving API response time by **34%**; applied **MongoDB/PostgreSQL** indexing and **Elasticsearch** to cut search latency.
- Produced **2 idempotent migration scripts** moving **1M+ records each**, enabling zero-downtime deployments.
- Applied deep **multithreading** expertise using **Task**-based parallelism, **async/await**, and **lock** synchronization to build thread-safe services and diagnose concurrency issues in high-throughput code paths.
- Secured single sign-out across **4 client applications** by migrating **Forms Authentication** to **JWT** over a **Redis** session store (replay window **7 days to under 1 second**); set up **OAuth 2.0** with **Okta** on **AWS EKS**.
- Modernized legacy **.NET Framework** (**ASP.NET MVC**, **Web API 2**) services to **.NET 8** with async/await, cutting technical debt by **55%** and boosting performance **30%**; overhauled **Azure DevOps** CI/CD to slash deployment time by **50%**.
- Adopted **Claude Code** and **GitHub Copilot** daily for implementation, debugging, and refactoring, reviewing all generated code before merge; built an **OpenAI API** agent routing **30--50 Jira tickets weekly**.
- Reached **90% code coverage** with **xUnit/NUnit** unit and integration tests, and mentored **4 junior engineers** through design docs and code reviews.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present

- Shipped a multi-tenant backend to production for **15+ client organizations** on **Spring Boot** (**Java 17**) and **PostgreSQL**, enforcing tenant isolation with **Hibernate** filters and a **ThreadLocal** tenant context, and **JWT** role-based access across **3 roles**.
- Designed a payroll engine supporting **3 salary models** with prorated rate changes and overtime, guarded by conflict checks against retroactive edits, plus a scheduled attendance backfill job.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Kafka** messaging and **Kong** API Gateway, containerized on **Docker/Kubernetes** and load tested with **1000+ simulated transactions**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 -- 2024 | CGPA: 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
