Sanskar Jain

.NET Developer | C#, ASP.NET Core, Web API, Microservices | Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of production **C#/.NET 8** experience building **ASP.NET Core Web API** services, **Entity Framework** data access, and **microservices** in **Agile/Scrum** teams. Applies **object-oriented** design, **design patterns**, and clean code practices, secures APIs with **OAuth 2.0/JWT**, and automates delivery through **Azure DevOps CI/CD**. Strong debugger and communicator, comfortable collaborating remotely with cross-functional stakeholders.

Technical Skills

Languages: C#, SQL, TypeScript, JavaScript, HTML, CSS
Backend & Frameworks: .NET 8, ASP.NET Core, Web API, ASP.NET MVC, Web API 2, .NET Framework, Entity Framework, LINQ, Dependency Injection, REST APIs, API Versioning, Swagger/OpenAPI, async/await
Design & Architecture: Object-Oriented Programming, SOLID Principles, Design Patterns (CQRS, Repository, Factory), Microservices, Event-Driven Architecture, Clean Code, Technical Design Documentation
Databases: PostgreSQL, MongoDB, Elasticsearch, Relational Database Design, Query Optimization, Indexing, Database Migrations, Redis
Security: OAuth 2.0, JWT, Okta, Kong API Gateway, Secure Coding, Role-Based Access Control
DevOps & Cloud: Azure DevOps, CI/CD Pipelines, Git, Docker, Kubernetes, AWS (SQS, SNS, Lambda, S3, EKS)
Testing & Practices: xUnit, NUnit, TDD, Unit/Integration Testing, Debugging, Troubleshooting, Code Review, Agile/Scrum

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Developed **ASP.NET Core Web API** services in **C#** applying **SOLID**, **dependency injection**, and **Repository/Factory** patterns with **Entity Framework** and **LINQ**, serving **200K+ weekly requests** with model validation, **URL-based versioning** across **16 v2 endpoints**, and **Swagger/OpenAPI** docs.
- Co-designed **RulesRunner**, a stateless **.NET** microservice using **CQRS** and **AWS SQS** that cut client wait time from **3000ms to 500ms (83%)**, authoring the technical design for service boundaries, API contracts, and dead-letter handling.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing, retry/backoff, **AWS SNS** publishing, and **Lambda** consumers, sustaining **500+ production messages daily** with zero message loss.
- Tuned slow queries by analyzing **SQL/MongoDB** access patterns, adding **indexes**, **Redis** caching, and connection pooling (**34%** faster API responses), and shipped **2 idempotent migration scripts** moving **1M+ records** each with zero downtime.
- Modernized legacy **.NET Framework** services (**ASP.NET MVC**, **Web API 2**) to **.NET 8** with **async/await**, cutting technical debt by **55%** and improving runtime performance by **30%**.
- Secured APIs by establishing **OAuth 2.0** with **Okta JWT** tokens on **AWS EKS** behind **Kong API Gateway** for **6 of 15+** services, and migrating **Forms Authentication** to **JWT** bearer auth over **Redis** sessions, shrinking the post-logout token replay window from **7 days to under 1 second**.
- Strengthened quality through **TDD** with **xUnit/NUnit** tests at **90% code coverage**, **Git** pull-request **code reviews**, and root-cause **debugging** of production incidents; **mentored 4 junior engineers**.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated tests, cutting deployment time by **50%** and build cycles by **33%** across **biweekly Agile/Scrum** releases.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present

- Shipped end-to-end, as sole engineer, a multi-tenant **SaaS** serving **15+ client organizations**, pairing a **TypeScript/React 18** UI with **REST** APIs, a relational **PostgreSQL** schema, **JWT** security, and **Docker** deployment.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Built **5+ REST** microservices with **Kong** routing and **Kubernetes** orchestration plus a **JavaScript/HTML/CSS** UI of **9+** components, validated with **1000+** simulated transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
