Sanskar Jain

Full-Stack Software Engineer | Java, Spring Boot, TypeScript, PostgreSQL | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-stack engineer with **2+ years** at Verisk Analytics building enterprise **REST** APIs on **Java 17** and **Spring Boot** with **PostgreSQL**, deployed on **AWS EKS** through **CI/CD** pipelines. Built and runs a **TypeScript/React** product as sole developer, from design through production, and has mentored junior engineers and reviewed code across **Agile** teams.

Technical Skills

Backend: Java 17, Spring Boot, REST APIs, Microservices, Swagger/OpenAPI, CQRS, Hibernate, Python
Frontend: TypeScript, React 18, JavaScript, HTML, CSS, Vite, Tailwind CSS, React Query
Databases: PostgreSQL, SQL, MongoDB, Redis, Query Optimization, Indexing
DevOps & Cloud: Kubernetes (AWS EKS), Docker, Azure DevOps, CI/CD, AWS (SQS, SNS, Lambda), Git
Security: OAuth 2.0, JWT, Okta, Role-Based Access Control
Practices: Unit/Integration Testing, TDD, SOLID, Code Review, Technical Design Docs, Agile/Scrum, AI-Assisted Development (Claude Code, GitHub Copilot)

Professional Experience

Verisk Analytics Hyderabad, India
Software Engineer II Apr 2026 -- Present
Software Engineer I Jul 2024 -- Mar 2026

- Built **Java 17 Spring Boot REST** API services backed by **PostgreSQL**, handling **∼200K requests a week**, with **URL-based versioning** across **16 v2 endpoints** and **Swagger/OpenAPI** docs.
- Co-designed **RulesRunner**, a stateless **Spring Boot** microservice using **CQRS** and an **AWS SQS**-backed worker that cut user wait time from about **3 s to 0.5 s**; authored the design docs for service boundaries and API contracts.
- Rolled out **OAuth 2.0** with **Okta**-issued **JWT**s on **Kubernetes** (**AWS EKS**) for **6 of 15+** services, and moved **4 client applications** from **Forms Authentication** to **JWT** bearer auth with token revocation.
- Tuned hot endpoints through **Redis** caching, connection pooling, and **indexing** on **MongoDB** and **PostgreSQL**, reducing response times by **∼34%**.
- Wrote unit and integration tests reaching **90% coverage** and applied **TDD** and **SOLID** principles to keep business logic testable and easy to review.
- Migrated legacy enterprise services (**ASP.NET MVC**, **Web API 2**) to **.NET 8** and wrote **2 migration scripts** moving **1M+ records** each.
- Reworked **Azure DevOps CI/CD** pipelines with staged gates and parallel jobs, roughly halving deployment time, across a biweekly **Agile/Scrum** release cycle.
- Reviewed code across multiple scrum teams through **Git** pull requests, mentored **4 junior engineers**, and diagnosed concurrency defects and flaky tests while supporting production.
- Designed event-driven pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent consumers, retry/backoff, and dead-letter queues, processing about **500 messages a day**.
- Wrote a **Python** agent on the OpenAI API that drafts and routes **30--50 Jira** tickets a week; use **Claude Code** and **GitHub Copilot** daily, reviewing all generated code before merge.

Software Engineering Intern Jan 2024 -- Jun 2024

Projects

Attendance & Payroll SaaS (sole developer) Jul 2026 -- Present

- Shipped a multi-tenant payroll and attendance product used by **15+ small businesses**, owning the full stack: a **TypeScript/React 18** UI built with **Vite**, **Tailwind CSS**, and **React Query**, a **Spring Boot** (**Java 17**) **REST** API, **PostgreSQL**, and **Docker** deployment.
- Isolated tenants through a shared-schema **org_id** with **Hibernate** filters, and secured the API with **JWT** access tokens, revocable refresh tokens, and 3-role **RBAC**.
- Implemented a payroll engine for monthly, daily, and hourly pay with prorated rate changes, overtime, and advances, locking finalized records against retroactive edits.

Expense Tracker -- Microservices Application Aug -- Dec 2023

- Created **5 REST** microservices on **Spring Boot** with **Kafka** messaging, containerized with **Docker** and run on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 -- 2024 | CGPA 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
