Sanskar Jain

Integration Developer | C# / .NET 8 | Event-Driven APIs | Azure DevOps CI/CD | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** at Verisk Analytics building **C#/.NET 8** integration services: **event-driven** queue pipelines, versioned **REST APIs** behind an API gateway, and **Azure DevOps CI/CD**. Writes design docs, debugs production issues, reviews code, and mentors juniors. Uses **GitHub Copilot** daily.

Technical Skills

Languages & Data Formats: C#, SQL, Python, JSON, XML
Integration & APIs: REST APIs, Swagger/OpenAPI, API Versioning, Kong API Gateway, Event-Driven Architecture, Microservices, CQRS, AWS SQS/SNS/Lambda, Apache Kafka
.NET: .NET 8, ASP.NET Core, ASP.NET MVC, Web API 2, .NET Framework, Entity Framework, Dependency Injection
CI/CD & Cloud: Azure DevOps Pipelines, Git, Terraform CDK (CDKTF), Docker, Kubernetes, AWS (EKS, EC2, Lambda, S3, ElastiCache, CloudWatch)
Security & Observability: OAuth 2.0, JWT, Okta, OpenTelemetry, Splunk, CloudWatch
Data, Testing & AI: MongoDB, PostgreSQL, Redis, xUnit, NUnit, Multithreading, GitHub Copilot, Claude Code, OpenAI API

Professional Experience

Verisk Analytics Hyderabad, India
Software Engineer II Apr 2026 -- Present
Software Engineer I Jul 2024 -- Mar 2026
Software Engineering Intern Jan 2024 -- Jun 2024

- Designed **event-driven** integration pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent consumers, retry/backoff, and dead-letter queues, processing about **500 production messages a day** across **eu-west-1** and **us-west-2**.
- Co-designed **RulesRunner**, a stateless **C#** microservice using **CQRS** and an **SQS**-backed worker that cut user wait time from about **3 s to 0.5 s**; authored the design docs for service boundaries, API contracts, and dead-letter queue handling.
- Built the backend for Xactimate import/export across **30+** data types using asynchronous processing, **S3** presigned URLs, **MongoDB**, and **XML** parsing in **C#**; transfers became **38%** faster.
- Developed **ASP.NET Core Web API** services on **.NET 8** with **Entity Framework**, serving about **200K requests a week**, with **URL-based versioning** across **16 v2 endpoints** and **Swagger/OpenAPI** docs.
- Secured services with **OAuth 2.0** and **Okta**-issued **JWTs** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+** platform services, and moved **4 client applications** from Forms Authentication to **JWT** bearer auth with token revocation over a shared **Redis** session store.
- Reworked **Azure DevOps CI/CD** pipelines with staged gates and parallel jobs, roughly halving deployment time, and deployed several applications to **AWS** production as infrastructure as code with **Terraform CDK (CDKTF)**.
- Migrated legacy **.NET Framework** services (**ASP.NET MVC**, **Web API 2**) to **.NET 8**, with **2 migration scripts** moving **1M+ records** each.
- Diagnosed **multithreading** defects and flaky tests, supported production issues **2--3 times a year**, and cut hot-endpoint response times by about **34%** with **Redis** caching and **MongoDB**/**PostgreSQL** indexing; integrated **OpenTelemetry** into an application and worked with **CloudWatch** and **Splunk** alerts and metrics.
- Reached **90% code coverage** with **xUnit**/**NUnit** tests, reviewed code across multiple scrum teams, and mentored **4 junior engineers**.
- Use **GitHub Copilot** and **Claude Code** daily, reviewing all generated code before merge; built a **Python** agent on the **OpenAI API** that drafts and routes **30--50 Jira** tickets a week.

Projects

Attendance & Payroll SaaS (sole developer) Jul 2026 -- Present

- Shipped a multi-tenant payroll and attendance product used by **15+ small businesses**: **Java 17**/**Spring Boot REST** API, **PostgreSQL**, **JWT** auth with role-based access, and a **React**/**TypeScript** UI.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed five **Spring Boot** microservices communicating over **Apache Kafka** behind **Kong API Gateway**, containerized with **Docker** and run on **Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 -- 2024 | CGPA 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
