Sanskar Jain

Software Engineer | Java & Spring Boot | AWS | React JS | AI-Assisted Development | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** designing, building, and operating secure, resilient **Java 17/Spring Boot** microservices on **AWS**, with **React JS** UI experience, across the full **SDLC** in **Agile**, **CI/CD** teams. Uses **GitHub Copilot** and **Claude Code** daily, validating every output through peer review, automated tests, and secure coding standards, and built an **OpenAI**-based workflow automation agent.

Technical Skills

Languages: Java 8+, Java 17, JavaScript, TypeScript, SQL, Python, C#
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, System Design, Event-Driven Architecture, Design Patterns (CQRS, Repository, Factory)
Frontend: React JS, JavaScript, TypeScript, HTML, CSS, Axios
AWS & DevOps: AWS (EKS, ECS, EC2, Lambda, S3, SQS, SNS), Docker, Kubernetes, Terraform, CDKTF, CI/CD, Azure DevOps Pipelines, Maven, Git
AI-Assisted Development: GitHub Copilot, Claude Code (code generation, refactoring, unit test creation, documentation), OpenAI API, Prompt Engineering
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Elasticsearch, Redis, Apache Kafka, AWS SQS/SNS, Query Optimization
Security & Practices: Secure Coding, OAuth 2.0, JWT, RBAC, Application Resiliency, Unit/Integration Testing, Code Review, Agile/Scrum, Jira

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and documenting service boundaries, API contracts, and dead-letter queue handling for upstream and downstream systems.
- Architected resilient **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff strategies, sustaining **500+ messages daily** with zero message loss under failure conditions.
- Built **Spring Boot REST APIs** serving **200K+ weekly requests**, versioning **16 v2 endpoints** for backward compatibility, and analyzing slow queries to tune **PostgreSQL/MongoDB** indexes and **Redis** caching, cutting response time by **34%**.
- Secured services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, and cut post-logout token replay from up to **7 days** to **under 1 second** using **JWT** revocation over a **Redis** session store.
- Adopted **GitHub Copilot** and **Claude Code** daily for code generation, refactoring, unit test creation, and documentation, critically validating all AI output through peer review, automated tests, and secure coding standards before merge.
- Wrote unit and integration tests reaching **90% code coverage** and overhauled **Azure DevOps CI/CD** pipelines with staged quality gates for **biweekly releases**, slashing deployment time by **50%**.
- Deployed multiple applications to **AWS** production (**EC2**, **EKS**) as infrastructure as code using **Terraform CDK (CDKTF)**, and troubleshot production incidents **2--3 times per year** to maintain operational stability.
- Automated Jira ticket triage with an internal **OpenAI API** workflow agent (**30--50 tickets per week**), and cut technical debt by **55%** migrating legacy services to modern async patterns.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Platform (Java 17, Spring Boot, React JS) Jul 2026 -- Present

- Built and operate a full-stack multi-tenant **SaaS** end to end -- **Spring Boot/Java 17** APIs, **React JS/TypeScript** UI, **PostgreSQL**, **Docker** -- serving **15+ client organizations** in production, secured with **Spring Security**, **JWT**, and role-based access control.

Expense Tracker -- Microservices Application (Java, Spring Boot, React JS, Kafka) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Apache Kafka** messaging and **PostgreSQL**, plus a **React JS** UI of **9+** reusable components in **JavaScript**, **HTML**, and **CSS**; deployed on **Kubernetes** and load-tested with **1000+ transactions**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
