Professional Summary

Software Engineer with **2+ years** of backend and data engineering experience, including hands-on **AI/ML** and **agentic AI** development -- an **OpenAI API**-based automation agent in production and a **Python/LSTM** time-series forecasting application. Builds **REST APIs**, microservices, and event-driven **data pipelines** across **SQL/NoSQL** stores, with a track record of cutting latency by **83%** and processing **1M+ record** migrations with zero downtime. Cloud-native practitioner (**AWS**, **Docker**, **Kubernetes**, **CI/CD**) with an ownership mindset across distributed, cross-functional Agile teams.

Technical Skills

Languages: Python, Java, C#, SQL, TypeScript
AI/ML & Agentic: OpenAI API, Prompt Engineering, LLM-Based Workflow Orchestration, LSTM/Time-Series Forecasting
Data Engineering: ETL/Data Pipelines, MongoDB, PostgreSQL, MySQL, Elasticsearch, Query Optimization, Data Migrations
Backend & APIs: REST APIs, Microservices, Spring Boot, ASP.NET Core, Event-Driven Architecture, Apache Kafka, AWS SQS/SNS, API Versioning
Cloud & DevOps: AWS (S3, EKS, ECS, Lambda, CloudWatch), Azure DevOps Pipelines, Docker, Kubernetes, Terraform, CI/CD, Git
Practices: Agile/Scrum, Code Review, Unit/Integration Testing, Swagger/OpenAPI, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Developed an internal **agentic** workflow automation agent on the **OpenAI API** using prompt engineering and custom orchestration, auto-creating and routing **30--50 Jira tickets per week** -- hands-on delivery of an AI-driven application.
- Engineered a scalable data pipeline for **Xactimate's** import/export of **30+ data types** using asynchronous processing, **AWS S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Co-designed **RulesRunner**, a stateless microservice using **CQRS** and **AWS SQS** event-driven messaging, cutting wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Built **REST APIs** serving **200K+ weekly requests** with structured error handling, model validation, and **Swagger/OpenAPI** documentation for cross-team consumption.
- Optimized **database indexing** across **MongoDB** and **PostgreSQL** by analyzing slow queries and access patterns, and applied **Elasticsearch** to cut search query latency on high-volume datasets.
- Authored **2 production-safe migration scripts** moving **1M+ records each** with idempotent, backward-compatible operations, enabling zero-downtime data pipeline deployments.
- Slashed deployment time by **50%** by overhauling **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing across cloud environments.
- Wrote unit and integration tests to reach **90% code coverage**, and adopted **AI-assisted development** (**GitHub Copilot**, **Claude Code**) daily for implementation, debugging, and refactoring.

Projects

Stock Recommendation and Prediction -- AI/ML Application (Python, LSTM) Apr 2022 -- Jun 2022

- Designed and trained an **LSTM**-based time-series model in **Python** for 30-day stock price forecasting, ingesting historical market data via the **Yahoo Finance API** into a **MySQL**-backed pipeline.
- Deployed the model behind a **REST API** and **Streamlit** web app with **Firebase** integration, delivering real-time predictions to end users.

Expense Tracker -- Event-Driven Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed an expense-tracking platform in **Java/Spring Boot** with **5+ microservices** and asynchronous **Apache Kafka** messaging for event-driven data flow, persisted in **PostgreSQL**.
- Containerized services with **Docker** and orchestrated on **Kubernetes**; simulated **1000+ transactions** end-to-end for load and resilience testing.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
