Sanskar Jain

Software Engineer | Java & Spring Boot | Kafka | Event-Driven Microservices
Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building secure, scalable, event-driven microservices and REST APIs, including hands-on **Java**, **Spring Boot**, and **Apache Kafka** development. Cuts latency by **83%**, sustains zero message loss across pipelines processing **500+ messages daily**, and uses **GitHub Copilot/Claude Code** daily to raise delivery speed in Agile teams.

Technical Skills

Languages: Java, C#, Python, TypeScript, JavaScript, SQL
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, ASP.NET Core, .NET 8, REST APIs, Microservices, Event-Driven Architecture, SOLID Principles, CQRS, API Versioning
Messaging & Caching: Apache Kafka, AWS SQS, AWS SNS, Redis, Amazon ElastiCache, Idempotency, Retry/Backoff
Cloud & DevOps: AWS (EKS, ECS, Lambda, S3, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines
Databases (SQL & NoSQL): PostgreSQL, MySQL, MongoDB, Elasticsearch, Schema Design, Query Optimization
Security: OAuth 2.0, OIDC, JWT, Okta, Kong API Gateway, Role-Based Access Control, Secure Coding
Testing & Practices: Unit/Integration/Regression Testing, Test Automation, Code Review, Git, Jira, Agile/Scrum, Swagger/OpenAPI, AI-Assisted Development (GitHub Copilot, Claude Code, OpenAI API)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **microservice** using **CQRS** and **AWS SQS** event-driven messaging that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing, retry/backoff strategies, and **AWS Lambda** consumers, sustaining **500+ production messages daily** with zero message loss under failure conditions.
- Applied **SOLID principles** and secure coding practices to build **REST APIs** (**ASP.NET Core**) serving **200K+ weekly requests**, with structured error handling, input validation, and **Swagger/OpenAPI** contracts.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization.
- Troubleshot production performance and data issues, improving API response time by **34%** through **Redis/ElastiCache** caching and query optimization, and tuning indexes across **MongoDB** and **PostgreSQL**.
- Contributed to **CI/CD** and operational readiness by overhauling **Azure DevOps** pipelines with staged gates and parallel jobs, slashing deployment time by **50%** and cutting technical debt by **55%** via legacy service modernization.
- Wrote unit, integration, and regression tests (**xUnit/NUnit**) to reach **90% code coverage**; adopted **AI-assisted development** (**GitHub Copilot**, **Claude Code**) daily for implementation, debugging, and refactoring, reviewing all generated code before merge.

Projects

Expense Tracker - Event-Driven Microservices (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed an expense-tracking platform in **Java/Spring Boot** with **5+ microservices** and **SOLID**-based object-oriented design, using asynchronous **Apache Kafka** messaging for event-driven, decoupled service communication routed through **Kong API Gateway**.
- Containerized all services with **Docker** and orchestrated deployments on **Kubernetes**, with **PostgreSQL** persistence; ran component and integration tests simulating **1000+ transactions** end-to-end for load and resilience validation.

Attendance & Payroll SaaS -- Multi-Tenant Platform (Spring Boot, Java 17) Jul 2026 -- Present

- Built and operate a multi-tenant **SaaS** backend on **Spring Boot 4/Java 17** and **PostgreSQL**, serving **15+ client organizations** in production as sole engineer, end to end.
- Secured the **REST API** with **Spring Security** and **JWT** (short-lived access tokens, revocable refresh tokens, role-based access control via `@PreAuthorize`), and automated jobs with **Spring @Scheduled**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
