Sanskar Jain

Full Stack Software Engineer | Java 8+ & Spring Boot | Event-Driven Microservices
Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full Stack Software Engineer with **2+ years** building reusable, scalable **Java/Spring Boot** microservices with **SOLID** principles and **event-driven architecture**, end to end across backend APIs and React frontends. Delivers real-time, high-throughput systems (**83%** latency cut, zero message loss across **500+ daily events**) in **CI/CD**-driven Agile teams, choosing RDBMS or NoSQL persistence based on use-case needs. Quick learner who runs proofs-of-concept and coordinates across cross-functional groups, sharing best practices through peer code reviews.

Technical Skills

Languages: Java 8+, Java 17, C#, Python, TypeScript, SQL
Backend & Frameworks: Spring Boot, Spring Framework, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, SOLID Principles, Design Patterns (CQRS, Repository, Factory)
Frontend & Messaging: React, HTML, CSS, Axios, Apache Kafka, AWS SQS, AWS SNS, Redis
Cloud & DevOps: AWS (EKS, ECS, Lambda, S3), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines
Persistence (RDBMS & NoSQL): PostgreSQL, MySQL, MongoDB, Elasticsearch, Query Optimization
Practices & Tools: Code Quality Gates, Code Review, Unit/Integration Testing, Agile/Scrum, Swagger/OpenAPI, Git, Jira, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java/Spring Boot** microservice using **CQRS** and **SQS** event-driven messaging for real-time compliance checks, cutting wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Applied **SOLID principles** and reusable design patterns to build scalable **Spring Boot** REST APIs serving **200K+ weekly requests**, with structured error handling, validation, and **Swagger/OpenAPI** contracts as a coding-quality gate.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing, retry/backoff strategies, and async consumers, sustaining **500+ real-time messages daily** with zero message loss under failure conditions.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization.
- Ran proof-of-concept evaluations of alternative technical solutions before migrating legacy services to modern async patterns, tuning **MongoDB/PostgreSQL** indexes and **Redis** caching to cut API response time by **34%**, technical debt by **55%**, and runtime by **30%**.
- Enforced coding best practices and code-quality gates by overhauling **CI/CD** pipelines in **Azure DevOps** with staged gates and parallel jobs, slashing deployment time by **50%**.
- Wrote unit and integration tests to reach **90% code coverage**, and adopted **AI-assisted development** (**GitHub Copilot**, **Claude Code**) daily for implementation, debugging, and refactoring, reviewing all generated code before merge.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Platform (Java 17, Spring Boot 4, React) Jul 2026 -- Present

- Built and operate a full-stack multi-tenant **SaaS** end to end -- **Spring Boot 4/Java 17** backend, **React/TypeScript** frontend, **PostgreSQL** persistence -- serving **15+ client organizations** in production as sole engineer.
- Secured the **REST API** with **Spring Security** and **JWT** (role-based access control via `@PreAuthorize`, revocable refresh tokens), and deployed **Docker**-containerized services.

Expense Tracker -- Event-Driven Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed **5+** independently deployable **Spring Boot** microservices with **SOLID**-based design and asynchronous **Apache Kafka** messaging, routed through **Kong API Gateway**, plus a **React** frontend of **9+** reusable components.
- Containerized services with **Docker** and orchestrated on **Kubernetes**; simulated **1000+ transactions** end-to-end for load and resilience testing.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
