Sanskar Jain

Software Engineer | Java 8+ & Spring Boot | Cloud-Native Event-Driven Microservices | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building reusable, scalable **Java/Spring Boot** microservices with **SOLID** principles and **event-driven architecture** on **AWS**, focused on customer-facing speed and reliability (**83%** faster client response, zero message loss across **500+ daily events**). Ships **real-time** systems through **CI/CD** in Agile teams, picks RDBMS or NoSQL by need, runs POCs, and **mentors junior engineers**.

Technical Skills

Languages: Java 8+, Java 17, C#, Python, TypeScript, JavaScript, SQL
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, Real-Time Systems, SOLID Principles, Object-Oriented Design, Design Patterns (CQRS, Repository, Factory)
Frontend & Messaging: React, HTML, CSS, Axios, Apache Kafka, AWS SQS, AWS SNS, Redis
Cloud & DevOps: AWS (EC2, EKS, ECS, Lambda, S3), Docker, Kubernetes, Cloud-Native Architecture, CI/CD, Azure DevOps Pipelines, Terraform, Maven
Persistence (RDBMS & NoSQL): PostgreSQL, MySQL, MongoDB, Elasticsearch, Query Optimization
Practices & Tools: Code Quality Gates, Code Review, Technical Mentoring, Unit/Integration Testing, Agile/Scrum, Swagger/OpenAPI, Git, Jira, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java/Spring Boot** microservice using **CQRS** and **SQS** event-driven messaging for real-time compliance checks, cutting customer wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Applied **SOLID principles** and reusable design patterns to build scalable **Spring Boot** REST APIs serving **200K+ weekly requests**, with structured error handling, validation, and **Swagger/OpenAPI** contracts as a coding-quality gate.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing, retry/backoff strategies, and async consumers, sustaining **500+ real-time messages daily** with zero message loss under failure conditions.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, deploying **cloud-native** services across **multiple AWS regions** (eu-west-1, us-west-2).
- Ran proof-of-concept evaluations before migrating legacy services to modern async patterns, tuning **MongoDB/PostgreSQL** indexes and **Redis** caching to cut API response time by **34%** and technical debt by **55%**.
- Enforced coding best practices by overhauling **CI/CD** pipelines in **Azure DevOps** with staged quality gates and parallel jobs for **biweekly releases**, slashing deployment time by **50%**.
- Wrote unit and integration tests reaching **90% code coverage** and **mentored 4 junior engineers** through code reviews and design guidance, while using **GitHub Copilot** and **Claude Code** daily with all generated code reviewed before merge.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Product (Java 17, Spring Boot 4, React) Jul 2026 -- Present

- Owned this product end to end as sole engineer -- **Spring Boot 4/Java 17** backend, **React/TypeScript** frontend, **PostgreSQL** -- from requirements to production, now serving **15+ client organizations**.
- Secured the **REST API** with **Spring Security** and **JWT** (role-based access, revocable refresh tokens) and deployed **Docker**-containerized services.

Expense Tracker -- Event-Driven Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed **5+** independently deployable **Spring Boot** microservices with **SOLID**-based design and asynchronous **Apache Kafka** messaging, routed through **Kong API Gateway**, plus a **React** frontend of **9+** reusable components.
- Containerized services with **Docker** and orchestrated on **Kubernetes**; simulated **1000+ transactions** end-to-end for load and resilience testing.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
