Sanskar Jain

Software Engineer | CI/CD & Platform | AWS EKS | Observability | Distributed Systems
Hyderabad, Telangana, India | +91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of experience building low-latency, high-throughput services and **CI/CD** pipelines on **AWS EKS** at Verisk Analytics, in **SAFe** and **Kanban** Agile teams. Cut a rules-processing wait from **3000ms to 500ms**, halved deployment time, and run **event-driven** messaging pipelines with zero message loss, troubleshooting production incidents with **Splunk** and **OpenTelemetry**. Also builds **Java**/**Spring Boot** services and AI-driven automation, and writes design documentation to team standards.

Technical Skills

CI/CD & Automation: Azure DevOps Pipelines, GitHub Actions, Build/Test/Deploy Pipelines, Python, Shell/CLI, Maven, Dependency Management, Multi-Environment Deployments
Cloud, Containers & IaC: AWS (EKS, ECS, Lambda, S3, SNS, SQS, ElastiCache, CloudWatch), Docker, Kubernetes, Helm, kubectl, Terraform, AWS CDK
Observability & Reliability: Splunk, OpenTelemetry, AWS CloudWatch, Distributed Tracing, Logging, Monitoring, Incident Troubleshooting, Root-Cause Analysis, SRE Practices
Languages & Frameworks: Java 8+/17, Spring Boot, Spring Framework, C#, .NET 8, ASP.NET Core, Python, SQL, REST APIs, Microservices
Messaging & Data: AWS SQS/SNS, Apache Kafka, Redis, PostgreSQL, MongoDB, Elasticsearch, Multi-threading/Async Processing
Testing, Security & Practices: JUnit, xUnit, NUnit, Integration Testing, OAuth 2.0, JWT, Kong API Gateway, Linux/Unix, Git, SAFe, Agile/Scrum, Kanban, Design Documentation, Code Review, AI-Assisted Development

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated testing across environments.
- Co-designed **RulesRunner**, a stateless, rules-evaluating microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83% improvement)** and scaling horizontally.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and dead-letter queues, sustaining **500+ production messages daily** with zero message loss.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization.
- Troubleshot production incidents across distributed services using **Splunk** logs, **OpenTelemetry** tracing, and **AWS CloudWatch**, cutting customer-reported issues by **25%** on Xactimate import/export.
- Built an internal **AI-driven workflow automation agent** on the **OpenAI API** that auto-creates and routes **30--50 Jira tickets per week**, and adopted **Claude Code** for daily implementation and debugging.
- Improved API response time by **34%** via **Redis**/**ElastiCache** caching and connection pooling, serving **200K+ weekly requests**; produced **2 idempotent migration scripts** moving **1M+ records each** with zero downtime.
- Cut technical debt by **55%** and improved runtime performance by **30%** migrating legacy **.NET Framework** services to **.NET 8** with async/await.
- Reached **90% code coverage** with **xUnit**/**NUnit** tests and authored technical design documents (service boundaries, API contracts, DLQ handling), partnering with product and technical leads on requirements.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant **SaaS** to production serving **15+ client organizations**, built end-to-end as sole engineer on **Spring Boot** (**Java 17**), **React**, and **PostgreSQL**, secured with **Spring Security**, **JWT**, and **RBAC**.
- Deployed the **Docker**-containerized backend to **Render** with managed **PostgreSQL**, and automated daily attendance backfill with a **Spring @Scheduled** job plus a secured cron fallback.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Built **5+ Java Spring Boot microservices** with **Apache Kafka** messaging and **Kong API Gateway**; containerized with **Docker**, deployed on **Kubernetes**, and load-tested with **1000+ transactions**.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune, India 2020 -- 2024 | CGPA: 8.8/10
