Sanskar Jain

Java Backend & Cloud Engineer | Spring Boot | AWS | Docker & Kubernetes | CI/CD | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Backend engineer with **2+ years** of experience building **Core Java/Spring Boot** event-based **microservices** and deploying them to **AWS** with **Docker**, **Kubernetes**, **Terraform CDK**, and **CI/CD** automation. Experienced in production support, reliability, security, and **OpenTelemetry** instrumentation within **Agile/Scrum** teams.

Technical Skills

Languages: Core Java 8+, Java 17 (Collections, Multithreading, Exception Handling), Python, SQL, JavaScript, TypeScript, C#
Backend & Microservices: Spring Boot, Hibernate (ORM), Spring Data JPA, Spring Security, REST APIs, Event-Driven Microservices, Design Patterns (CQRS, Repository, Factory)
Cloud & Containers: AWS (EKS, ECS, EC2, Lambda, S3, SQS, SNS), Docker, Kubernetes, Terraform, CDKTF, Infrastructure as Code, Auto-Scaling
CI/CD & Automation: Azure DevOps Pipelines, CI/CD Pipeline Design, Automated Testing, Release Automation, Maven, Git, Bash/Shell Scripting, Python Scripting, Linux/CLI
Monitoring & Reliability: OpenTelemetry, Logging, Tracing, Monitoring, Production Support, Incident Resolution, High Availability, Scalability
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Apache Kafka, AWS SQS/SNS
Security & Practices: OAuth 2.0, JWT, RBAC, Secure Coding, Unit/Integration Testing, Code Review, Agile/Scrum, Jira, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Architected resilient **event-based** microservice pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and dead-letter queues, sustaining **500+ messages daily** with zero message loss under failure conditions.
- Deployed applications to **AWS** production (**EC2**, **EKS**) as infrastructure as code using **Terraform CDK (CDKTF)**, building and shipping containerized microservices to the cloud.
- Overhauled **Azure DevOps CI/CD** pipelines with staged quality gates, parallel jobs, and automated testing for **biweekly releases**, slashing deployment time by **50%** and build cycles by **33%**.
- Secured services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, and cut post-logout token replay from up to **7 days** to **under 1 second** using **JWT** revocation over a **Redis** session store.
- Built **Spring Boot REST APIs** serving **200K+ weekly requests** using **Core Java** collections, multithreading, and structured exception handling, cutting response time by **34%** with **Redis** caching and index tuning.
- Automated repetitive build, deployment, and environment tasks with **Bash** and **Python** scripts on **Linux**, reducing manual effort and release errors across **CI/CD** workflows.
- Integrated **OpenTelemetry** into a production application for tracing and logging, and handled production support and incident resolution **2--3 times per year**, tracing root causes and shipping fixes to protect reliability.
- Wrote unit and integration tests reaching **90% code coverage**, mentored **4 junior engineers**, and adopted **GitHub Copilot** and **Claude Code** daily, reviewing all output before merge.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Spring Boot, Hibernate, PostgreSQL, Docker) Jul 2026 -- Present

- Built a multi-tenant **Spring Boot SaaS** serving **15+ client organizations**, using **Hibernate ORM** with tenant filters over **PostgreSQL**, **Spring Security/JWT**, and a **Docker**-containerized deployment with automated scheduled jobs.

Expense Tracker -- Microservices Application (Spring Boot, Kafka, Docker, Kubernetes) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Apache Kafka** messaging and **PostgreSQL**, containerized with **Docker** and orchestrated on **Kubernetes**, load-tested with **1000+** transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
