Sanskar Jain

Software Engineer | C#, ASP.NET Core, Microservices, Event-Driven Systems | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Backend Software Engineer with **2+ years** of production **C#/ASP.NET Core** experience at Verisk Analytics, building **REST** APIs with **Entity Framework**, **microservices**, and **event-driven** systems on **AWS**. Leads work from technical design through delivery, modernizes legacy **ASP.NET MVC/.NET Framework** applications, secures APIs with **OAuth 2.0/OIDC/JWT**, and mentors engineers while raising testing and code-review standards. Available for overlap with Australian client and delivery teams.

Technical Skills

Languages: C#, SQL, TypeScript, JavaScript, HTML, CSS
Backend & Frameworks: .NET 8, ASP.NET Core, ASP.NET MVC, ASP.NET Web API 2, .NET Framework, Entity Framework, LINQ, Dependency Injection, REST APIs, API Versioning, CQRS, Asynchronous Programming (async/await)
Architecture: Microservices, Event-Driven Architecture, Distributed Systems, SOLID Principles, Idempotency, Retry/Backoff, Dead-Letter Queues, Technical Design Documentation
Security & Identity: OAuth 2.0, OpenID Connect, JWT, Okta, Kong API Gateway, Role-Based Access Control
Databases: PostgreSQL, MongoDB, Query Optimization, Indexing, Database Migrations
Cloud & DevOps: Azure DevOps Pipelines, CI/CD, AWS (SQS, SNS, Lambda, S3, EKS), Docker, Kubernetes, Redis
Testing & Practices: xUnit, NUnit, Unit/Integration Testing, Git, Pull Requests, Code Review, Debugging, Root Cause Analysis, Agile/Scrum
Frontend: React 18, TypeScript, JavaScript, HTML, CSS

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Led design-to-delivery of **RulesRunner**, a **C#** microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client and cut wait time from **3000ms to 500ms (83%)**, authoring the technical design covering service boundaries, API contracts, and dead-letter handling.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing, retry/backoff, **AWS SNS** publishing, and **AWS Lambda** consumers, sustaining **500+ production messages daily** with zero message loss.
- Developed **ASP.NET Core** REST services built on **SOLID** principles, **dependency injection**, **Entity Framework**, and **LINQ**, serving **200K+ weekly requests** with **async/await** processing, model validation, **URL-based versioning** across **16 v2 endpoints**, and **Swagger/OpenAPI** documentation.
- Diagnosed slow queries and integration failures by profiling SQL/**MongoDB** access patterns, tuning indexes, and adding **Redis** caching and connection pooling, cutting API response time **34%**; resolved concurrency defects and production incidents through root-cause analysis.
- Modernized legacy **.NET Framework** services (**ASP.NET MVC**, **Web API 2**) to **.NET 8**, cutting technical debt **55%** and improving runtime **30%**, and wrote **2 migration scripts** moving **1M+ records** each with zero downtime.
- Established **OAuth 2.0/OpenID Connect** authentication on **AWS EKS** behind **Kong API Gateway** for **6 of 15+** services using **Okta JWT** tokens, and migrated **Forms Authentication** to **JWT** bearer auth over a **Redis** session store, shrinking the post-logout replay window from **7 days to under 1 second**.
- Raised engineering standards through **TDD** with **xUnit/NUnit** tests reaching **90% code coverage**, **Git** pull-request **code reviews**, and an **Azure DevOps CI/CD** overhaul that cut deployment time **50%**; mentored **4 junior engineers**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present

- Shipped end-to-end, as sole engineer, a multi-tenant **SaaS** serving **15+ client organizations**, pairing a **TypeScript/React 18** UI with a **REST** API, **PostgreSQL**, **JWT** security, role-based access control, and **Docker** deployment.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Built **5+ REST** microservices with **Kong** routing, **Kubernetes** orchestration, and a **JavaScript/HTML/CSS** UI of **9+** components, validated with **1000+** simulated transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
