Sanskar Jain

Full-Stack Software Engineer | React & TypeScript | RESTful APIs | AWS | GenAI | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-Stack Software Engineer with **2+ years** delivering secure, scalable solutions across UI, API, data, and cloud layers with **React/TypeScript**, **RESTful** microservices, and **AWS**. Builds LLM-enabled workflows on the **OpenAI API** and uses **GitHub Copilot** daily, validating all AI output across the full **SDLC**.

Technical Skills

Frontend: React 18, TypeScript, JavaScript, HTML, CSS, Vite, TailwindCSS, TanStack React Query, Axios, Responsive UI
Backend & APIs: C#, .NET 8, ASP.NET Core, Java 17, Spring Boot, Spring Security, Hibernate, RESTful APIs, GraphQL, Swagger/OpenAPI, Microservices Architecture, Event-Driven Architecture, CQRS
AI & Developer Tools: GitHub Copilot, Claude Code, OpenAI API, LLM Integration, Prompt Engineering, AI Agent Orchestration, MCP Servers
Cloud & DevOps: AWS (EKS, Lambda, S3, SQS, SNS, ElastiCache, CloudWatch), Docker, Kubernetes, Terraform CDK (CDKTF), Infrastructure as Code, CI/CD, Azure DevOps Pipelines, Git, OpenTelemetry, Splunk
Data: PostgreSQL, MongoDB, Elasticsearch, Redis, Apache Kafka, Database Schema Design, Indexing
Security & Quality: OAuth 2.0, JWT, Okta, Kong API Gateway, RBAC, Secure Coding, xUnit, NUnit, Unit/Integration Testing, Code Reviews, Technical Documentation, Agile/Scrum, Jira

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **.NET 8** microservice using **CQRS** and **AWS SQS** that offloaded compliance checks, cutting wait time from **3000ms to 500ms (83%)**, and authored the technical design documentation defining service boundaries and API contracts.
- Architected fault-tolerant **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff, sustaining **500+ production messages daily** with zero message loss.
- Built **ASP.NET Core RESTful APIs** serving **200K+ weekly requests** with **Swagger/OpenAPI** contracts, URL-based versioning across **16 v2 endpoints**, and **GraphQL** APIs for client applications.
- Secured **6 of 15+** platform services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** using **Okta**-issued **JWT**s, and migrated **4 client apps** to JWT bearer auth over a **Redis** session store, shrinking the post-logout token replay window from **7 days to under 1 second**.
- Tuned hot-path performance with **Redis**/**ElastiCache** caching (**34%** faster responses), **MongoDB**/**PostgreSQL** index tuning, and **Elasticsearch**; shipped **2 zero-downtime migrations** of **1M+ records**.
- Developed an internal **GenAI** workflow agent on the **OpenAI API** with prompt engineering and custom orchestration, auto-routing **30--50 Jira tickets weekly**; use **GitHub Copilot**, **Claude Code**, and Atlassian **MCP servers** for coding, tests, and docs, reviewing all AI output for correctness and security.
- Overhauled **Azure DevOps CI/CD** pipelines with staged quality gates, parallel jobs, and automated tests for **biweekly product rollouts**, slashing deployment time by **50%** and build cycles by **33%**.
- Provisioned **AWS** infrastructure as code with **Terraform CDK (CDKTF)** across **2 regions** (eu-west-1, us-west-2), monitored via **OpenTelemetry**, **CloudWatch**, and **Splunk** alerts.
- Wrote **xUnit**/**NUnit** unit and integration tests reaching **90% code coverage**, led **code reviews**, and mentored **4 junior engineers** while planning and tracking sprint work in **Jira** within **Agile/Scrum** teams.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Platform Jul 2026 -- Present

- Shipped to production as sole engineer (requirements through deployment), serving **15+ client organizations**; created a responsive **React 18**/**TypeScript** UI with **HTML**, **CSS**, **Vite**, **TailwindCSS**, and **TanStack React Query**, plus **Axios** interceptors for transparent **JWT** refresh.
- Engineered **Java 17**/**Spring Boot** APIs with **Spring Security**, **RBAC** across **3 roles**, and tenant isolation via **Hibernate** filters on a **PostgreSQL** schema, containerized with **Docker**.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Delivered a **React**/**JavaScript** UI of **9+** reusable components backed by **5+ Spring Boot** microservices, **Apache Kafka**, and **PostgreSQL**, deployed on **Kubernetes** and load-tested with **1000+ transactions**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
