Sanskar Jain

Software Engineer | Java | Python | SQL | AI Agents | AWS
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

Software engineer with 2+ years building **Java/Spring Boot** microservices, **SQL**-driven data systems, and **AWS**-hosted REST APIs at Verisk Analytics, plus hands-on experience designing **LLM-powered AI agents** using the **OpenAI API** with custom prompt engineering and orchestration. Strong **problem-solving and analytical skills**, applied within **Agile/Scrum** methodologies, with a track record of clear **communication and cross-team collaboration** across distributed engineering teams. Comfortable across the stack with **Python**, **React** front-ends, and relational/NoSQL databases.

Skills

AI Agentic & GenAI: OpenAI API, Prompt Engineering, Agent/Workflow Orchestration, LLM Integration Patterns, Context Management
Languages: Java 17, Python, SQL, C#, JavaScript
Backend & Frameworks: Spring Boot, REST APIs, Microservices, Kafka, Redis, CQRS
Frontend: React, HTML5, CSS3, REST API Integration
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, Lambda), Docker, Kubernetes, CI/CD, Terraform
Databases: PostgreSQL, MySQL, MongoDB, Query Optimization, Database Design, Indexing
Practices & Tools: Agile/Scrum, Git, Azure DevOps, Jira, Swagger/OpenAPI, Splunk, Code Reviews
Professional Skills: Problem-Solving, Analytical Thinking, Technical Communication, Collaboration

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Architected **RulesRunner**, an event-driven **Java/Spring Boot** microservice using **CQRS** and **AWS SQS**, cutting client wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Built **LLM-powered internal AI agents** using the **OpenAI API**, applying prompt engineering and custom orchestration logic to automate **Jira** ticket creation and task routing across teams.
- Collaborated with senior engineers on service boundaries and **API contracts**, authoring design documentation reviewed across distributed teams for a compliance-checking platform.
- Delivered **REST APIs** handling **200K+ weekly requests** with structured error handling, input validation, and **Swagger/OpenAPI** documentation on **AWS**-hosted infrastructure.
- Tuned **SQL** queries, indexes, and schema design across **PostgreSQL** and **MongoDB**, analyzing access patterns and slow queries to improve API response time by **34%** with **Redis** caching.
- Engineered an async import/export pipeline for **30+ data types** using **S3** presigned URLs and **Python** scripting for data validation, reducing transfer time by **38%** and issues by **25%**.
- Resolved production defects and reduced mean time to diagnose incidents by instrumenting services with structured logging and **Splunk** dashboards on **Docker**/**Kubernetes** deployments.
- Streamlined **CI/CD** pipelines in **Azure DevOps** with staged gates and parallel jobs, cutting deployment time by **50%**; participated in structured **code reviews** and wrote unit/integration tests across an **Agile Scrum** delivery model.

Projects

Internal Workflow Automation Agent 2025 – Present
OpenAI API, Python, Prompt Engineering, Jira, REST APIs

- Designed an **AI agent** that parses task requests and drafts/creates **Jira** tickets via prompt-engineered calls to the **OpenAI API**, with orchestration logic for context management and validation.

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
Java, Spring Boot, React, Kafka, SQL/NoSQL

- Built **5+ Spring Boot** microservices with async **Kafka** messaging and a **React** UI consuming REST/JSON APIs, backed by relational and NoSQL data stores, containerized with **Docker**.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
