Sanskar Jain

Software Engineer | Java & Spring Boot | SQL | REST APIs & Microservices | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of professional experience developing and maintaining scalable **Java 17/Spring Boot** backend services, **REST APIs**, and microservices backed by **SQL** databases and **Redis** caching. Writes clean, well-tested code (**90% coverage**), contributes to **code reviews**, and ships through **CI/CD** pipelines in Agile teams, with working knowledge of **ReactJS**.

Technical Skills

Languages: Java 8+, Java 17 (Streams, Lambdas, Optional), SQL, JavaScript, TypeScript, Python, C#
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, Swagger/OpenAPI
Databases & Caching: SQL, PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Schema Design, Indexing, Query Optimization, Database Migrations
Frontend: ReactJS, JavaScript, TypeScript, HTML, CSS, Axios
Testing & Version Control: Unit Testing, Integration Testing, Test Automation, Code Review, Git
CI/CD & Cloud: CI/CD, Azure DevOps Pipelines, AWS (EC2, EKS, Lambda, S3, SQS, SNS), Docker, Kubernetes, Terraform, Maven
Practices: Agile/Scrum, Technical Documentation, Troubleshooting & Debugging, AI-Assisted Development (GitHub Copilot, Claude Code), Jira

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)**, and authored technical documentation for service boundaries and API contracts.
- Developed and maintained **Spring Boot REST APIs** serving **200K+ weekly requests**, with validation, structured error handling, **Swagger/OpenAPI** docs, and **16 versioned v2 endpoints**.
- Improved performance by analyzing slow **SQL** queries, tuning **PostgreSQL**/**MongoDB** indexes, and adding **Redis** caching, cutting API response time by **34%**; also ran **2 idempotent migration scripts** over **1M+ records each**.
- Built fault-tolerant **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff, sustaining **500+ messages daily** with zero message loss.
- Wrote unit and integration tests reaching **90% code coverage**, and participated in **code reviews** on architecture, edge cases, and production readiness while mentoring **4 junior engineers**.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing for **biweekly releases**, slashing deployment time by **50%**, and fixed production defects **2--3 times per year**.
- Cut technical debt by **55%** migrating legacy services to modern async patterns, and adopted **GitHub Copilot** and **Claude Code** daily to learn and apply new tooling, reviewing all generated code before merge.
- Secured services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, using **JWT** revocation on **Redis** to cut post-logout token replay from up to **7 days** to **under 1 second**.
- Built **GraphQL** APIs and integrated **OpenTelemetry** for tracing and observability, and developed an internal **OpenAI API** workflow agent that auto-routes **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Java 17, Spring Boot, PostgreSQL, ReactJS) Jul 2026 -- Present

- Built and operate a full-stack **SaaS** serving **15+ client organizations** in production -- **Spring Boot**/**Java 17 REST APIs**, **PostgreSQL**, **ReactJS**/**TypeScript** UI, **Docker** -- secured with **Spring Security** and **JWT**.
- Enforced tenant isolation with **Hibernate** filters and role-based access control across **3 roles**, and built a payroll engine supporting **3 salary models** with prorated rate changes and overtime.

Expense Tracker -- Microservices Application (Java, Spring Boot, ReactJS, Kafka) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Apache Kafka** and **PostgreSQL**, plus a **ReactJS** UI of **9+** reusable components; deployed on **Docker**/**Kubernetes**.
- Routed traffic through **Kong API Gateway** and load-tested the platform end to end with **1000+ transactions**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
