Sanskar Jain

Software Engineer | Cloud-Native Platform & Infrastructure | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building and operating cloud-based platform services at Verisk Analytics, a data and analytics platform company, with hands-on **Kubernetes** (**AWS EKS**, **Istio**), **Kong API Gateway**, **Docker**, **CDKTF** infrastructure as code, and **Azure DevOps CI/CD** across multiple regions. Pairs **C#/.NET** and **PowerShell** automation with distributed-systems experience, **OAuth 2.0** identity, **OpenTelemetry**, **CloudWatch**/**Splunk** monitoring, and production support, and is eager to build reliable infrastructure on **Azure** and open-source technologies.

Technical Skills

Cloud & Containers: AWS (EKS, SQS, SNS, Lambda), Kubernetes, Istio, Docker, Kong API Gateway
IaC & Automation: CDKTF (Terraform CDK), Infrastructure as Code, PowerShell, Azure DevOps, CI/CD
Observability & Operations: OpenTelemetry, Distributed Tracing, AWS CloudWatch, Splunk, Alerting & Metrics, Redis Caching, Production Support, Root Cause Analysis
Security & Identity: OAuth 2.0, OpenID Connect, JWT, Okta, Role-Based Access Control, Session Management
Distributed Systems: Microservices, Event-Driven Architecture, Apache Kafka, Idempotency, Retry/Backoff, Dead-Letter Queues
Languages & Backend: C#, .NET 8, Java, Spring Boot, TypeScript
Practices: Agile/Scrum, Unit Testing (xUnit, NUnit), Mentoring, AI-Assisted Development (Claude Code, GitHub Copilot)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Established **OAuth 2.0**/**OpenID Connect** authentication on **AWS EKS** with **Istio** and **Kong API Gateway** for **6 of 15+** platform services, integrating **Okta**-issued **JWT** tokens for secure cross-service authorization.
- Provisioned and deployed multiple production applications on **AWS** across **two regions** (eu-west-1 and us-west-2) using **CDKTF** (Terraform CDK) **infrastructure as code**.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, **PowerShell** automation, and automated testing, cutting deployment time **50%** and build cycles **33%** for biweekly releases.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing, retry/backoff, and **dead-letter queues**, sustaining **500+ production messages daily** with zero message loss.
- Secured single sign-out across **4 client applications** by moving legacy **Forms Authentication** to **JWT** bearer auth over a **Redis** session store with dual-layer revocation, shrinking the post-logout replay window from **7 days to under 1 second**.
- Hardened **Okta Event Hooks** logout propagation across **4 tenants** with an idempotent webhook receiver and a System Log reconciliation poller that recovers **100%** of dropped notifications.
- Integrated **OpenTelemetry** tracing into a production application, monitored service health with **CloudWatch** and **Splunk** alerts and metrics, and cut API response time **34%** via **Redis** caching, while handling production support and root-cause analysis.
- Developed an internal **workflow automation agent** on the **OpenAI API** that auto-creates and routes **30--50 Jira tickets weekly**, and wrote **C#** services where **xUnit**/**NUnit** tests reached **90% code coverage**.
- Migrated legacy **.NET Framework** services to **.NET 8**, cutting technical debt **55%**, and mentored **4 junior engineers** while reviewing all **Claude Code** and **GitHub Copilot** output before merge.

Projects

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Containerized **5+ Spring Boot** microservices with **Docker**, orchestrated them on **Kubernetes**, and routed traffic through **Kong API Gateway** for load balancing and authentication.
- Connected services with asynchronous **Apache Kafka** messaging and validated resilience with **1000+** simulated transactions.

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present

- Shipped a multi-tenant **SaaS** serving **15+ client organizations** as sole engineer, with **JWT** security, role-based access control, and a **Docker**-containerized **Spring Boot** backend plus **TypeScript** frontend deployed to **Render**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
