Sanskar Jain

Software Engineer | Java | Cloud SaaS | Microservices | AWS | Docker & Kubernetes | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** building highly available, secure, cloud-native **SaaS** services in **Java 17/Spring Boot** on **AWS** across multiple regions, using **microservices**, **REST APIs**, **Docker**, **Kubernetes**, and SQL/NoSQL stores with caches. Translates system designs into production code, solves complex production issues, and champions testing, security, and automation in small, iterative **Agile/Scrum** teams.

Technical Skills

Languages: Java 17, C#, Python, SQL, JavaScript, TypeScript
Backend & APIs: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST API Design, API Versioning, GraphQL, Swagger/OpenAPI, OAuth 2.0, JWT
Distributed Systems: Microservices, Real-Time Event-Driven Architecture, Apache Kafka, AWS SQS/SNS, CQRS, Idempotency, Retry/Backoff, Dead-Letter Queues, Multithreading, Horizontal Scaling
Cloud & Containers: AWS Multi-Region (eu-west-1, us-west-2; EKS, ECS, EC2, Lambda, S3, ElastiCache), Docker, Kubernetes, Terraform, CDKTF, Kong API Gateway
Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, Indexing, Query Optimization, Database Migrations
Testing & CI/CD: Unit/Integration Testing, Test Automation, xUnit, NUnit, CI/CD, Azure DevOps Pipelines, Git, OpenTelemetry
Practices: Agile/Scrum, Iterative Delivery, System Design, Technical Design Documents, Code Review, Production Support, AI-Assisted Development (Claude Code, GitHub Copilot)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot** microservice using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and enabling horizontal scaling.
- Translated system designs into production services by authoring technical design documents covering service boundaries, API contracts, dead-letter queue handling, and event publishing, then partnering with peers through design and code reviews.
- Architected fault-tolerant, real-time **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff, sustaining **500+ messages daily** with zero message loss under failure conditions.
- Built **REST** and **GraphQL** APIs serving **200K+ weekly requests**, versioned **16 v2 endpoints** for backward compatibility, and resolved concurrency defects in multithreaded services.
- Tuned **MongoDB/PostgreSQL** indexes, added **Redis** caching, and traced bottlenecks with **OpenTelemetry** to cut API response time by **34%**, while resolving production incidents **2--3 times per year**.
- Operated services on **AWS EKS** and **EC2** across **multi-region** deployments (**eu-west-1** and **us-west-2**), provisioned multiple production applications with **Terraform CDK (CDKTF)**, and overhauled **Azure DevOps CI/CD** pipelines with automated testing and staged gates, slashing deployment time by **50%** across **biweekly** releases.
- Secured services with **OAuth 2.0** and **JWT** behind **Kong API Gateway** on **AWS EKS** for **6 of 15+ platform services**, and reached **90% code coverage** with unit and integration tests.
- Mentored **4 junior engineers**, used **Claude Code** and **GitHub Copilot** daily while reviewing all generated code before merge, and built an **OpenAI API** agent auto-routing **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Platform (Java 17, Spring Boot, PostgreSQL, React) Jul 2026 -- Present

- Shipped a multi-tenant **SaaS** to production as sole engineer, serving **15+ client organizations**, with **Hibernate**-enforced tenant isolation, **Spring Security** with **JWT** and role-based access, **Docker** deployment, and a **React/TypeScript** frontend.

Expense Tracker -- Distributed Microservices Application (Java, Spring Boot, Kafka) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with asynchronous **Apache Kafka** streaming and **PostgreSQL**, containerized with **Docker**, orchestrated on **Kubernetes**, and load-tested with **1000+ transactions**.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
