Sanskar Jain

Full-Stack Software Engineer | REST APIs | React | AWS | CI/CD
Hyderabad, Telangana, India | +91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-stack Software Engineer with **2+ years** of professional experience building enterprise, cloud-based **REST API** services on **AWS** at Verisk Analytics, plus production **React** + **TypeScript** applications delivered end-to-end. Serves **200K+ weekly API requests**, cut latency by **83%**, and halved deployment time through **CI/CD** automation in **SAFe** and **Kanban** Agile teams. Strong debugger and collaborator with a Bachelor's in Computer Engineering and fast ramp-up on new frameworks.

Technical Skills

Backend: REST APIs, JSON, Python, C#, Java, ASP.NET Core, .NET 8, Spring Boot, Swagger/OpenAPI, API Versioning, Microservices, SQL
Frontend: JavaScript, TypeScript, HTML5, CSS3, React 18, Vite, TailwindCSS, TanStack React Query, Axios
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, ECS, Lambda, ElastiCache, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines, GitHub Actions, Automated Build Pipelines, Linux/CLI
Version Control & Testing: Git, Code Review, Unit Testing, Integration Testing, xUnit, NUnit, JUnit, Test Automation, Code Coverage
Databases & Messaging: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, Apache Kafka, AWS SQS/SNS
Observability & Reliability: OpenTelemetry, Splunk, AWS CloudWatch, Logging, Monitoring, Tracing, Retry/Backoff, Idempotency, Dead-Letter Queues
Security & Practices: OAuth 2.0, JWT, RBAC, Agile/Scrum, SAFe, Kanban, Jira, Confluence, Technical Design Documentation

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Built enterprise **REST APIs** serving **200K+ weekly requests** with **JSON** contracts, model validation, structured error handling, and **Swagger/OpenAPI** documentation; shipped **URL-based API versioning** across **16 v2 endpoints** for backward compatibility.
- Co-designed **RulesRunner**, a stateless microservice using **CQRS** and **AWS SQS** that offloaded compliance checks from the client, cutting wait time from **3000ms to 500ms (83% improvement)**.
- Engineered a backend for **Xactimate's** import/export of **30+ data types** using asynchronous processing, **Amazon S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%** and customer-reported issues by **25%**.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated testing.
- Architected fault-tolerant **event-driven** pipelines on **AWS SQS**, **SNS**, and **Lambda** with idempotent processing and dead-letter queues, sustaining **500+ production messages daily** with zero message loss.
- Improved API response time by **34%** via **Redis**/**ElastiCache** caching and query tuning; cut technical debt by **55%** migrating legacy **.NET Framework** services to **.NET 8**.
- Secured **6 of 15+ platform services** on **AWS EKS** with **OAuth 2.0** and **Okta**-issued **JWT** tokens behind **Kong API Gateway**, and monitored services with **Splunk**, **OpenTelemetry**, and **CloudWatch**.
- Reached **90% code coverage** with **xUnit**/**NUnit** tests, and built an **OpenAI API** workflow agent that auto-routes **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a full-stack multi-tenant **SaaS** to production serving **15+ client organizations**, built end-to-end as sole engineer with a **React 18** + **TypeScript** frontend, **Spring Boot** (**Java 17**) **REST API**, and **PostgreSQL**.
- Secured the app with **JWT** (15-minute access, revocable 7-day refresh tokens), **role-based access control** across **3 roles**, and **Axios** interceptors for transparent token refresh in the SPA.
- Deployed the **Docker**-containerized backend and **React** SPA to **Render** with managed **PostgreSQL**, and automated daily attendance backfill via a scheduled job.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed a responsive **React** frontend of **9+ reusable components** in **JavaScript**, **HTML**, and **CSS** over **5+ Spring Boot microservices** with **Kafka** and **Kong API Gateway**, deployed with **Docker** and **Kubernetes**.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune, India 2020 -- 2024 | CGPA: 8.8/10
