Sanskar Jain

Java Full Stack Developer | Java & Spring Boot | ReactJS | Microservices | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Java Full Stack Developer with **2+ years** of experience building scalable, secure **Java/Spring Boot microservices** and **RESTful APIs** on **AWS**, plus responsive **ReactJS** interfaces, across the full **SDLC** in **Agile**, **CI/CD** teams. Strong in **OOP**, multithreading, performance optimization, and troubleshooting.

Technical Skills

Languages: Java 8+, Java 17 (OOP, Collections, Multithreading, Exception Handling), JavaScript, TypeScript, SQL, Python, C#
Backend & Microservices: Spring Boot, Spring Security, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture, Design Principles (SOLID), Design Patterns (CQRS, Repository, Factory)
Frontend: ReactJS, Component-Based Architecture, State Management, API Integration, TanStack React Query, Axios, JavaScript, TypeScript, HTML, CSS, Tailwind CSS
Cloud & DevOps: AWS (EKS, ECS, EC2, Lambda, S3, SQS, SNS), Docker, Kubernetes, Terraform, CDKTF, CI/CD, Azure DevOps Pipelines, Maven, Git
Databases & Messaging: PostgreSQL, MySQL, MongoDB, Elasticsearch, Redis, Apache Kafka, AWS SQS/SNS, Query Optimization
Security & Practices: Application Security, OAuth 2.0, JWT, RBAC, Unit/Integration Testing, Code Review, Agile/Scrum, Jira, Technical Design Documentation, AI-Assisted Development (GitHub Copilot, Claude Code)

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java 17/Spring Boot microservice** using **CQRS** and **AWS SQS** to offload compliance checks, cutting wait time from **3000ms to 500ms (83%)** and documenting service boundaries, API contracts, and dead-letter queue handling for service-to-service communication.
- Architected resilient **event-driven** pipelines on **SQS**, **SNS**, and **Lambda** with idempotent processing and retry/backoff strategies, sustaining **500+ messages daily** with zero message loss under failure conditions.
- Built **Spring Boot RESTful APIs** serving **200K+ weekly requests**, versioning **16 v2 endpoints** for backward compatibility, and tuning **PostgreSQL/MongoDB** indexes with **Redis** caching to cut response time by **34%**.
- Applied **Java Collections** (`HashMap`, `List`, `Set`, `Streams`) and structured **exception handling** (custom exceptions, global handlers) across **Spring Boot** services, and resolved **multithreading** concurrency issues with thread-safe design and locking.
- Troubleshot production incidents **2--3 times per year**, tracing root causes and shipping fixes to maintain operational stability.
- Secured services with **OAuth 2.0** on **AWS EKS** behind **Kong API Gateway** for **6 of 15+ platform services**, and cut post-logout token replay from up to **7 days** to **under 1 second** using **JWT** revocation over a **Redis** session store.
- Wrote unit and integration tests reaching **90% code coverage** and overhauled **Azure DevOps CI/CD** pipelines with staged quality gates for **biweekly releases**, slashing deployment time by **50%**.
- Deployed applications to **AWS** production (**EC2**, **EKS**) as infrastructure as code with **Terraform CDK (CDKTF)**, and mentored **4 junior engineers** through code reviews and engineering best practices.
- Adopted **GitHub Copilot** and **Claude Code** daily for refactoring, test creation, and documentation, reviewing all output before merge, and built an **OpenAI API** workflow agent automating **30--50 Jira tickets per week**.

Projects

Attendance & Payroll SaaS -- Full-Stack Multi-Tenant Platform (Java, Spring Boot, ReactJS) Jul 2026 -- Present

- Built and operate a multi-tenant **SaaS** end to end -- **Spring Boot** APIs, **PostgreSQL**, **Docker** -- serving **15+ client organizations**, secured with **Spring Security**, **JWT**, and role-based access control across **3 roles**.
- Developed the **ReactJS/TypeScript** UI with reusable components, **TanStack React Query** server-state management, and **Axios** interceptors for transparent token refresh against the REST API.

Expense Tracker -- Microservices Application (Spring Boot, ReactJS, Kafka) Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Apache Kafka** messaging and **PostgreSQL**, plus a **ReactJS** UI of **9+** reusable components in **JavaScript**, **HTML**, and **CSS**; deployed on **Kubernetes** and load-tested with **1000+** transactions.

Education & Certifications

B.Tech in Computer Engineering 2020 -- 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
