Sanskar Jain

Software Engineer | Java / Spring Boot | REST APIs | Cloud
Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Software Engineer with **2+ years** of experience delivering high-quality, well-tested **Java/Spring Boot REST APIs** and distributed **microservices** in production at Verisk Analytics, complemented by hands-on **Java 17/Spring Boot** development shipping a multi-tenant SaaS platform end-to-end. Proficient in **Spring Boot**, **Spring Security**, **Spring Data JPA/Hibernate**, and modern **Java (8/11/17/21)**, with strong fundamentals in **JUnit**-based testing, **Agile/Scrum/SAFe** delivery, and independent ownership from design through production support -- comfortable with minimal supervision and upskilling quickly on new technologies.

Technical Skills

Languages: Java (8, 11, 17, 21), C#, Python, TypeScript, JavaScript, SQL
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA/Hibernate, .NET 8, ASP.NET Core, REST APIs, Microservices, API Versioning, React 18
Testing & Quality: JUnit, xUnit, NUnit, Unit Testing, Integration Testing, Test Automation, Code Review, 90% Test Coverage
Architecture & Patterns: Microservices Architecture, Event-Driven Architecture, CQRS, Multi-Tenant SaaS, Repository/Factory Patterns, Idempotency, Retry/Backoff, Dead-Letter Queues, Caching Strategies
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, ECS, Lambda, ElastiCache, CloudWatch), Docker, Kubernetes, Terraform, CI/CD, Azure DevOps Pipelines, Apache Kafka, Redis
Security & Databases: OAuth 2.0, OIDC, JWT, Okta, RBAC, PostgreSQL, MongoDB, MySQL, Elasticsearch, Schema Design, Query Optimization
Practices & Tools: Agile/Scrum, SAFe (Scaled Agile Framework), Git, Jira, Confluence, Swagger/OpenAPI, Technical Design Documentation

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless **Java**-based microservice using **CQRS** and **AWS SQS** with idempotent, retry/backoff-driven event processing, reducing wait time from **3000ms to 500ms (83% improvement)** while sustaining **500+ messages daily** with zero message loss.
- Built **REST APIs** (**Java/Spring Boot**) serving **200K+ weekly requests** with structured error handling, model validation, and **Swagger/OpenAPI** documentation; implemented **URL-based API versioning** across **16 v2 endpoints** for backward compatibility.
- Improved API response time by **34%** through **Redis/Amazon ElastiCache** caching, connection pooling, and query optimization on hot-path endpoints.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **CI/CD** pipelines (**Azure DevOps**) with staged gates, parallel jobs, and automated testing.
- Wrote unit and integration tests (**JUnit/xUnit/NUnit**) to reach **90% code coverage**, and participated in structured **code reviews** covering architecture, edge cases, and production readiness for every feature shipped.
- Delivered features within a **SAFe (Scaled Agile Framework)** environment during the first year on the team, participating in **PI planning**, sprint reviews, and cross-team dependency management alongside standard **Agile/Scrum** ceremonies.

Projects

Attendance & Payroll SaaS (Java/Spring Boot) Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant attendance and payroll **SaaS** to production, now serving **15+ client organizations**, built end-to-end as sole engineer on **Spring Boot 4** (**Java 17**), **React 18** + **TypeScript**, and **PostgreSQL**, validated with **JUnit** test suites.
- Protected the API with **Spring Security** and **JWT** -- **15-minute** access tokens, revocable **7-day** refresh tokens persisted server-side, and **role-based access control** across **3 roles** via `@PreAuthorize`.

Expense Tracker -- Microservices Application (Java/Spring Boot) Aug 2023 -- Dec 2023

- Developed an expense tracking platform using **Java** and **Spring Boot** with **5+ microservices**, asynchronous **Apache Kafka** messaging, and **Kong API Gateway**; containerized with **Docker** on **Kubernetes** and validated with **JUnit** test suites across **1000+ simulated transactions**.

Certifications & Education

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024
B.Tech in Computer Engineering, VIT, Pune, India 2020 -- 2024 | CGPA: 8.8/10
