Sanskar Jain

Full Stack Software Engineer | React/TypeScript | ETL & Data Pipelines | AWS | Hyderabad, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full stack software engineer with **2+ years** of experience building web applications, REST APIs, and data import/export pipelines at Verisk Analytics, plus a production multi-tenant **React/TypeScript** SaaS built end-to-end. Strong in **data structures & algorithms** (**500+ LeetCode problems solved**), clean tested code (**90% coverage**), and moving between backend and frontend to ship quickly in **Agile** teams.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, TypeScript, React 18, Vite, TailwindCSS, TanStack React Query, Axios, Responsive/Cross-Browser Design
Backend & Languages: C#, .NET 8, ASP.NET Core, Java, Spring Boot, Python, SQL, REST APIs, Microservices, Swagger/OpenAPI
Data & ETL: ETL/Data Pipelines, Async Batch Processing, Data Validation, Data Migration, Idempotent Jobs, MongoDB, PostgreSQL, MySQL, Elasticsearch
Data Structures & Algorithms: 500+ LeetCode Problems, Arrays, Hash Tables/Maps, Stacks, Queues, Trees, Heaps, Graphs, Sorting, Searching, Graph Traversals, Recursion
Cloud, Messaging & DevOps: AWS (S3, SQS, SNS, Lambda, EKS, ElastiCache), Kafka, Redis, Docker, Kubernetes, Terraform, CI/CD, Azure DevOps, Git
Practices & AI Tooling: Unit/Integration Testing (xUnit, NUnit), Code Review, Technical Design Docs, Agile/Scrum, OAuth 2.0, JWT, Claude Code, GitHub Copilot, OpenAI API

Professional Experience

Verisk Analytics Jan 2024 -- Present
Software Engineer II Hyderabad, India

- Engineered a scalable import/export data pipeline for **Xactimate** covering **30+ data types** using asynchronous processing, **Amazon S3** presigned URLs, and **MongoDB**, cutting transfer time by **38%** and customer-reported issues by **25%**.
- Produced **2 production-safe migration scripts** moving **1M+ records each** with idempotent, backward-compatible operations, enabling zero-downtime deployments.
- Built **ASP.NET Core** REST APIs serving **200K+ weekly requests** with model validation and **Swagger/OpenAPI** docs, and versioned **16 v2 endpoints** so client applications could migrate without breaking changes.
- Architected **RulesRunner**, an event-driven microservice on **CQRS** and **AWS SQS/SNS**, cutting client wait time from **3000ms to 500ms (83%)** and sustaining **500+ production messages daily** with retries and dead-letter queues.
- Tuned hot-path endpoints with **Redis/ElastiCache** caching, indexing across **MongoDB/PostgreSQL**, and **Elasticsearch**, improving API response time by **34%**.
- Secured single sign-out across **4 client applications** by moving **Forms Authentication** to **JWT** with a **Redis** session store, shrinking the post-logout token replay window from **7 days to under 1 second**.
- Modernized legacy **.NET Framework** (**ASP.NET MVC**, **Web API 2**) services to **.NET 8**, cutting technical debt by **55%**; overhauled **Azure DevOps** CI/CD to slash deployment time by **50%**.
- Automated Jira triage with an **OpenAI API** workflow agent routing **30--50 tickets weekly**; used **Claude Code/GitHub Copilot** daily to speed iteration while reviewing all generated code before merge.
- Reached **90% code coverage** with **xUnit/NUnit** tests, wrote design docs advising stakeholders on tradeoffs, and mentored **4 junior engineers** through code reviews.

Projects

Attendance & Payroll SaaS -- Multi-Tenant Production Platform Jul 2026 -- Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant **SaaS** to production serving **15+ client organizations**, built solo on **React 18**, **TypeScript**, **Spring Boot** (**Java 17**), and **PostgreSQL**, with tenant isolation and **JWT**-based role access across **3 roles**.
- Designed a payroll engine supporting **3 salary models** with prorated rate changes and overtime, plus a scheduled daily attendance backfill job, deployed via **Docker** on **Render**.

Expense Tracker -- Microservices Application Aug 2023 -- Dec 2023

- Developed **5+ Spring Boot** microservices with **Kafka** messaging and a **React** frontend of **9+ reusable components** in **JavaScript**, **HTML**, and **CSS**, containerized on **Docker/Kubernetes**.

Education & Certifications

B.Tech in Computer Engineering, Vishwakarma Institute of Technology, Pune 2020 -- 2024 | CGPA: 8.8/10
AWS Certified Cloud Practitioner, Amazon Web Services Oct 2024
