Sanskar Jain

Full-Stack Software Engineer | Cloud-Native Systems | AI-Accelerated Development
Hyderabad, Telangana, India
+91 90216 20156 | sanskarjain0901@gmail.com | linkedin.com/in/sanskar-jain0901

Professional Summary

Full-stack Software Engineer with **2+ years** of experience designing and shipping scalable, cloud-native applications across **C#/.NET**, **Java/Spring Boot**, and **React** stacks, with a curiosity-driven habit of picking up new tools and languages fast. Builds reliable, high-impact systems on **AWS**: cut latency **83%**, served **200K+** weekly API requests, and halved deployment time through rigorous system design and **CI/CD** automation. Early adopter of **AI-assisted development** – built a production automation agent on the **OpenAI API** and uses **Claude Code** daily to accelerate delivery, improve code quality, and modernize workflows. Collaborates closely with cross-functional **Agile/Scrum** teams and values open communication and diverse perspectives when solving complex engineering problems.

Technical Skills

Languages: C#, Java, Python, TypeScript, JavaScript, SQL
AI & Automation: OpenAI API, Claude Code, Prompt Engineering, LLM Integration, Automated Code Generation, AI-Assisted Development
Cloud & DevOps: AWS (S3, SQS, SNS, EKS, ECS, Lambda, ElastiCache, CloudWatch), Docker, Kubernetes, Terraform, CI/CD (Azure DevOps)
Backend & Frameworks: .NET 8, ASP.NET Core, Spring Boot, Spring Data JPA/Hibernate, REST APIs, Microservices, Event-Driven Architecture
Frontend: React 18, TypeScript, JavaScript, HTML5, CSS3, TanStack React Query, Axios, Vite
Messaging & Data: Apache Kafka, AWS SQS/SNS, Redis, PostgreSQL, MongoDB, MySQL, Elasticsearch
Architecture & Practices: CQRS, Design Patterns, SOLID Principles, Idempotency, Caching Strategies, OAuth 2.0/JWT, Agile/Scrum, Code Review

Professional Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Co-designed **RulesRunner**, a stateless microservice using **CQRS** and **AWS SQS**, cutting compliance-check latency from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Architected fault-tolerant **event-driven** pipelines with idempotent processing and retry/backoff, sustaining **500+ messages/day** with zero message loss – a reliable, production-hardened solution under failure conditions.
- Built and versioned **16 REST API** v2 endpoints serving **200K+ weekly requests**, with **Swagger/OpenAPI** docs and guaranteed backward compatibility.
- Tuned **PostgreSQL/MongoDB** indexing and query patterns, and cut API response time **34%** via **Redis** caching and connection pooling.
- Cut deployment time **50%** and build cycles **33%** by overhauling **CI/CD** pipelines with staged gates and parallel jobs on **AWS**.
- Built an internal automation agent on the **OpenAI API** using prompt engineering, auto-creating and routing **30–50 Jira tickets/week**; adopted **Claude Code** daily to accelerate feature work, debugging, and refactoring.
- Wrote **xUnit/NUnit** unit and integration tests reaching **90% coverage**, and mentored **4 junior engineers** through structured code reviews and open technical discussion.

Projects

Attendance & Payroll SaaS – Multi-Tenant Production Platform Jul 2026 – Present
Live: sanskar-engineers-payroll-ui.onrender.com

- Shipped a multi-tenant **SaaS** platform end-to-end on **Spring Boot 4** (**Java 17**), **React 18** + **TypeScript**, and **PostgreSQL**, now serving **15+ client organizations**.
- Designed relational schemas with tenant isolation via **Hibernate/JPA** filters and **AOP**, and secured the API with **Spring Security** + **JWT**-based **RBAC** across 3 roles.
- Automated workflows via a **Spring @Scheduled** job and deployed **Docker**-containerized backend/**React** SPA with managed **PostgreSQL**.

Expense Tracker – Microservices Application Aug 2023 – Dec 2023

- Built **5+ Java/Spring Boot** microservices with asynchronous **Apache Kafka** messaging and **Kong API Gateway** for routing and authentication.
- Delivered a **React** frontend (9+ components) over **REST** services and **PostgreSQL**; containerized with **Docker** on **Kubernetes** and load-tested **1000+** transactions end-to-end.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering 2020 – 2024
Vishwakarma Institute of Technology, Pune, India CGPA: 8.8/10
