Sanskar Jain

Full-Stack Engineer | Java / Spring | TypeScript | Cloud-Native APIs
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

Full-stack software engineer with 2+ years of industry experience building scalable REST APIs, Spring-based microservices, and TypeScript-driven applications. Proven ability to own features end-to-end — from server-side design through cloud deployment — in fast-paced Agile teams. Strong foundation in data structures, algorithms, and distributed systems. Hands-on with Docker, AWS, Azure, automated testing, and CI/CD pipelines; consistently ships reliable, high-quality software with minimal supervision.

Skills

Languages: Java, C#, Python, TypeScript, JavaScript
Server-Side: Spring Boot, Spring MVC, Spring Data JPA (Hibernate), REST APIs, GraphQL, Microservices, Kafka
Client-Side: TypeScript, React, REST API integration
Cloud & DevOps: AWS (S3, SQS, SNS, Lambda, EKS), Azure DevOps, Docker, Kubernetes, Terraform, CI/CD
Databases: PostgreSQL, MySQL, MongoDB, Redis
Testing & Tools: Unit Testing, xUnit, Test Automation, Swagger, Postman, Splunk, Jira, Bitbucket

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Designed and delivered production **REST APIs** and **microservices** handling **200K+ weekly requests**, with structured error handling, input validation, and Swagger-documented contracts ensuring reliability and clear API ownership.
- Built **RulesRunner**, a **Java/C#**-style server-side microservice backed by **SQS** that offloaded compliance checks from the client, reducing wait time from **3000ms to 500ms** (83%) through decoupled, independently scalable service design.
- Engineered a scalable **Spring**-style import/export pipeline for **30+ data types** using async processing, **AWS S3** pre-signed URLs, and **MongoDB**, cutting data transfer time by **38%** and reducing user-reported issues by **25%**.
- Improved API response time by **34%** via **Redis** caching, connection pooling, and targeted **SQL query optimisation** on PostgreSQL hot-path endpoints, demonstrating strong data structures and performance reasoning.
- Built and maintained **automated test suites** with parallelised unit testing and pipeline-integrated regression checks, accelerating build and test cycle by **33%** and enabling the team to ship **10+ features per quarter**.
- Overhauled **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated test integration, cutting deployment time by **50%** and eliminating all manual release steps.
- **Containerised** services with **Docker** and deployed to **Kubernetes (EKS/ECS)**, ensuring environment consistency across dev, staging, and production in a multi-service Agile delivery workflow.
- Eliminated message loss by designing **AWS SNS**, Lambda, and S3 pipelines with idempotent processing and retry/backoff logic, improving async delivery reliability across distributed workflows.
- Reduced mean time to diagnose incidents by instrumenting services with structured logging and **Splunk** dashboards, surfacing error trends and latency spikes in real time across production environments.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
Java, Spring Boot, Spring Data JPA (Hibernate), Kafka, TypeScript, Docker, PostgreSQL

- Built 5+ **Spring Boot** microservices with **Spring Data JPA / Hibernate** for ORM, and a **TypeScript** frontend client consuming REST APIs, demonstrating end-to-end full-stack ownership.
- Simulated **1000+ transactions** with async **Kafka** inter-service communication; containerised all services with **Docker**, cutting environment setup time by **60%**; integrated Kong API Gateway for routing and auth.

Stock Recommendation and Prediction Platform Apr 2022 – Jun 2022
Python, LSTM, Firebase, Streamlit, REST APIs

- Developed a data-driven advisory platform applying algorithmic modelling (LSTM) for 30-day stock predictions; integrated Yahoo Finance API, Firebase, and a lightweight frontend — independently designed and shipped end-to-end.

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
