Summary

Backend engineer with 2+ years of experience building cloud-native microservices, event-driven systems, and REST APIs in Agile/SCRUM production environments. Proficient in Java 17, Spring Boot, Spring Data JPA, and distributed architectures using Kafka, AWS, and Docker. Strong command of OOP design principles, clean service layering, and CI/CD-driven delivery; experienced shipping scalable, observable backend services end-to-end.

Skills

Languages: Java (Java 17), Python, TypeScript
Backend: Spring Boot, Spring Framework, Spring Data JPA, Hibernate, REST APIs, Microservices, Kafka, Redis
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, Lambda), Azure DevOps, CI/CD (Jenkins/Azure Pipelines), Docker, Kubernetes, Terraform
Databases: PostgreSQL, MySQL, MongoDB
Tools: Maven, Git, GitLab, Bitbucket, Jira, Swagger, Postman, Splunk

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Designed **RulesRunner**, an event-driven **Java 17 / Spring Boot** microservice consuming **SQS** messages that decoupled compliance rules into an independently scalable service, cutting client wait time from **3000ms to 500ms** (**83%**).
- Reduced API response time by **34%** by integrating **Redis** caching, connection pooling, and query optimisation on hot-path **Spring Boot** REST endpoints, sustaining **200K+ weekly requests** reliably.
- Built production REST APIs using **Spring Boot** and **Spring MVC** with structured error handling, input validation, OOP design patterns (SOLID, layered architecture), and **Swagger**-documented contracts.
- Engineered async **AWS SNS**, Lambda, and S3 messaging pipelines with idempotent processing and retry/backoff handling, eliminating message loss under failure conditions at scale.
- Slashed deployment time by **50%** by overhauling **CI/CD** pipelines (Jenkins/Azure DevOps) with staged gates, parallel jobs, and automated test integration, removing all manual release steps.
- Achieved **85%+** unit and integration test coverage using **JUnit 5** and **Mockito**, accelerating build/test cycles by **33%** through parallelised testing and caching, enabling **10+** features per quarter within SCRUM sprints.
- Reduced mean time to diagnose production incidents by **40%** by instrumenting services with structured logging and **Splunk** dashboards, surfacing error trends, latency spikes, and pipeline failures in real time.
- Engineered a scalable data pipeline for import/export of **30+** data types using async processing, **AWS S3** presigned URLs, and **Spring Data** repositories, reducing transfer time by **38%** and user-reported issues by **25%**.

Projects

Expense Tracker – Java Spring Boot Microservices Aug 2023 – Dec 2023

- Architected a full-stack expense tracker using **Java 17** and **Spring Boot** with **5+** independently deployable microservices communicating via async **Kafka** topics, demonstrating event-driven design at the service boundary.
- Modelled domain entities with **Spring Data JPA** and **Hibernate**, applying OOP principles and clean service layering to separate persistence, business logic, and API concerns across bounded contexts.
- Integrated **Kong API Gateway** for routing, rate limiting, load balancing, and token-based authentication; validated end-to-end flow with **1000+** simulated transactions.
- Containerised all services with **Docker** and Docker Compose, cutting local environment setup time by **60%** and enabling reproducible, environment-consistent deployments.

Stock Recommendation and Prediction Apr 2022 – Jun 2022

- Developed a stock advisory platform using **Python** and **LSTM** models for 30-day price predictions, integrating Yahoo Finance API and **Firebase** for real-time market data ingestion.
- Deployed an interactive dashboard via **Streamlit**, demonstrating end-to-end data pipeline design from ingestion to prediction to presentation.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

Bachelor of Technology in Computer Engineering
Vishwakarma Institute of Technology, Pune (S.P.P.U) 2024
CGPA: 8.8
