Sanskar Jain

.NET Software Engineer | C# | Microservices | Cloud-Native Development
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

C#/.NET software engineer with 2+ years of professional experience building and maintaining production **ASP.NET MVC/Web API 2** applications on **.NET Framework**, then leading their migration to cloud-native **ASP.NET Core**/.NET 8 microservices at Verisk Analytics. Skilled in applying common architectural patterns (**CQRS**, event-driven, API versioning) across distributed systems deployed on **AWS**, with hands-on **Azure DevOps** CI/CD pipeline ownership. Comfortable across the stack, from **SQL Server/T-SQL** data design to frontend integration, delivering reliably within **Agile** teams.

Skills

Languages & Web: C#, Java, Python, JavaScript, TypeScript, HTML, CSS, Angular (basic), React (basic)
Frameworks & Platforms: .NET Framework, ASP.NET MVC, Web API 2, .NET 8/.NET Core, ASP.NET Core, REST APIs, Microservices
Databases: SQL Server, T-SQL, Stored Procedures, Relational Database Design, PostgreSQL, MySQL, MongoDB, Query Optimization
Architecture & Patterns: Microservices Architecture, CQRS, Event-Driven Design, API Versioning, Cloud-Native Development
Cloud & DevOps: AWS (S3, SNS, SQS, EKS, ECS, Lambda), Azure DevOps, Docker, Kubernetes, Terraform, CI/CD
Practices & Tools: Agile/Scrum, xUnit/NUnit, Swagger/OpenAPI, Code Reviews, Git, Jira, Splunk

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Architected **RulesRunner**, a stateless **C#** microservice applying **CQRS** and event-driven patterns over **AWS SQS**, reducing client wait time from **3000ms to 500ms (83%)** while enabling independent horizontal scaling.
- Designed and delivered **ASP.NET Core Web API** services handling **200K+ weekly requests**, with relational data models, structured error handling, and **Swagger/OpenAPI**-documented API contracts.
- Built a scalable import/export backend for **Xactimate** covering **30+ data types** using async **C#** processing, **SQL**-backed persistence, and **AWS S3** presigned URLs, cutting transfer time by **38%** and issues by **25%**.
- Implemented **URL-based API versioning** and integration patterns across services to ensure backward compatibility and support seamless client migrations in a microservices architecture.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong Gateway**, integrating **Okta JWT** tokens with existing Identity Server flows for secure cross-service authorization.
- Optimised **database indexing and query performance** across relational and NoSQL stores, and improved API response time by **34%** via **Redis** caching and connection pooling on high-throughput endpoints.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates, parallel jobs, and automated testing, cutting deployment time by **50%** and build cycles by **33%** within an **Agile** delivery model.
- Built and maintained production **ASP.NET MVC/Web API 2** applications on **.NET Framework**, then led their migration to **.NET 8/.NET Core**, reducing technical debt by **55%** and improving runtime performance by **30%** with modern async patterns and dependency injection.
- Instrumented services with **Splunk** logging and **OpenTelemetry** tracing, reducing mean time to diagnose production incidents; wrote unit/integration tests with **xUnit/NUnit** and led structured code reviews.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
C#, Spring Boot, Angular/React basics, SQL, Docker, Kubernetes

- Built a full-stack expense tracker with **5+ microservices**, async **Kafka** communication, and a **HTML/CSS/JavaScript** frontend consuming **REST/JSON** APIs backed by relational data models.
- Containerised all services with **Docker** and orchestrated deployments using **Kubernetes**; integrated **Kong API Gateway** for routing and auth, simulating **1000+ transactions** for load testing.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
