## Summary

Backend engineer with 2+ years of experience delivering cloud-native microservices and RESTful APIs in **C#/.NET 8** on **AWS**. Proven track record in OOP design patterns, test-driven development with **xUnit/NUnit**, and CI/CD automation in **Agile/Scrum** teams. Strong problem-solving skills with hands-on exposure to performance optimisation, security best practices, and Infrastructure as Code using **Terraform**.

## Skills

**Languages:** C#, Java, Python
**Backend & Design:** .NET 8, ASP.NET Core, REST APIs, Microservices, CQRS, OOP, Design Patterns, API Versioning
**Testing:** xUnit, NUnit, Unit Testing, Integration Testing, Test Automation, Code Reviews
**Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, SQS, SNS, EKS, CloudWatch, ElastiCache), Docker, Kubernetes, Terraform, CI/CD
**Security:** OAuth 2.0, JWT, Okta, Kong Gateway, Cloud Security Best Practices
**Databases:** MongoDB, PostgreSQL, MySQL, Query Optimisation, Indexing
**Tools:** Jira, Confluence, Azure DevOps, Swagger/OpenAPI, Splunk, OpenTelemetry

## Experience

**Verisk Analytics** Jan 2024 – Present
**Software Engineer II, Hyderabad, India**

- Co-designed **RulesRunner**, a stateless microservice applying **CQRS** and **SQS** event-driven patterns that reduced compliance-check latency from **3000ms to 500ms (83%)** and enabled horizontal scaling.
- Built **ASP.NET Core** REST APIs handling **200K+ weekly requests**, applying **OOP principles**, SOLID design patterns, structured error handling, and **Swagger/OpenAPI** documentation.
- Wrote comprehensive **xUnit/NUnit** unit and integration tests; enforced test automation in CI gates and conducted structured **code reviews** covering architecture, edge cases, and production readiness.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong Gateway**, integrating **Okta JWT** tokens with Identity Server for secure cross-service authorisation following cloud security best practices.
- Engineered scalable data pipeline for **Xactimate's** import/export of **30+ data types** using async processing, **AWS S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%**.
- Improved API response time by **34%** through **Redis/ElastiCache** caching, connection pooling, and query optimisation; monitored performance via **CloudWatch** and **Splunk** dashboards.
- Architected event-driven pipelines with **AWS Lambda**, idempotent processing, and retry/backoff strategies ensuring zero message loss under failure conditions.
- Slashed deployment time by **50%** and build cycles by **33%** by overhauling **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated test suites.
- Managed cloud infrastructure with **Terraform** for reproducible deployments; authored idempotent migration scripts enabling zero-downtime releases.
- Cut technical debt by **55%** and improved runtime performance by **30%** by migrating legacy services to **.NET 8** with modern async/await patterns; tracked and prioritised work in **Jira** across Scrum sprints.
- Leveraged **AI coding tools** (GitHub Copilot) to accelerate feature development, test generation, and debugging, improving individual delivery throughput.
- Instrumented services with **OpenTelemetry** tracing and **CloudWatch** alerts, reducing mean time to diagnose production incidents.

## Projects

**Expense Tracker – Microservices Application** Aug 2023 – Dec 2023

- Built expense tracker with **5+ microservices** in **Spring Boot**, applying **OOP design patterns**, async **Kafka** communication, and **Kong API Gateway** for routing and auth.
- Containerised services with **Docker**, orchestrated deployments on **Kubernetes**, and simulated **1000+ transactions** end-to-end for load and performance testing.

## Certifications

**AWS Certified Cloud Practitioner** Amazon Web Services — Oct 2024

## Education

**B.Tech in Computer Engineering** – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
