Sanskar Jain

.NET Software Engineer | ASP.NET MVC | IIS | C# | SQL Server
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

C# and .NET software engineer with 2+ years developing production, server-based applications and REST APIs using **ASP.NET MVC**, **.NET Core**, **Entity Framework**, and **IIS**. Experienced in object-oriented, asynchronous, and n-tier application development, SQL performance tuning, and JSON/XML integrations. Independent contributor and collaborative Agile team member with hands-on ownership across design, development, testing, deployment, and production support.

Skills

Languages & Web: C#, Java, JavaScript, HTML/CSS, XML, JSON, AJAX, Object-Oriented Programming
Microsoft Stack: .NET 8, .NET Core, ASP.NET, ASP.NET MVC, Web API, IIS, Visual Studio, VSTS
Data & ORM: SQL Server, T-SQL, PostgreSQL, MySQL, MongoDB, Entity Framework (EF Core / EF6), RDBMS Concepts
Testing & Performance: NUnit, xUnit, Moq, Unit/Integration Testing, Performance Tuning, Query Optimization
Tools & Practices: Azure DevOps (TFS/VSTS), Git, Swagger/OpenAPI, Postman, Splunk, CI/CD, Agile/Scrum, Code Reviews

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Developed and maintained **ASP.NET MVC/Web API** services processing **200K+ weekly requests**, applying object-oriented and n-tier design with validation, structured error handling, and documented contracts.
- Deployed and supported **ASP.NET/.NET** web applications on **IIS**, diagnosing application-pool, configuration, logging, and runtime issues across server-based environments.
- Modelled relational data with **Entity Framework (EF Core)** and **SQL Server**, using projections, indexing, and tuned **T-SQL** queries to improve API response time by **34%** on high-traffic endpoints.
- Designed **RulesRunner**, an asynchronous server-side microservice that offloaded compliance processing from the client and reduced wait time from **3000ms to 500ms** (**83%**).
- Engineered the **Xactimate** import/export backend for **30+ data types**, integrating **JSON/XML** payloads and SQL-backed pipelines while reducing transfer time by **38%** and production issues by **25%**.
- Authored unit and integration tests with **NUnit**, **xUnit**, and **Moq**, isolating service dependencies and protecting critical business logic from release regressions.
- Modernised legacy **ASP.NET** services to **.NET 8**, improving runtime performance by **30%** and reducing technical debt by **55%** through dependency injection and async programming patterns.
- Built and debugged application features in **Visual Studio**; managed source control, builds, releases, and automated quality gates through **VSTS/Azure DevOps**, cutting deployment time by **50%**.
- Produced technical designs and participated in peer reviews covering architecture, edge cases, performance, and production readiness while delivering within an **Agile/Scrum** team.
- Instrumented services with structured logging and **Splunk** dashboards, accelerating diagnosis of production latency, integration, and server failures.

Projects

Expense Tracker – Microservices Application Aug 2023 – Dec 2023
Java, Spring Boot, JavaScript, SQL, Docker, Kong API Gateway

- Built a full-stack application with **5+ microservices** and an HTML/JavaScript interface consuming REST APIs through **JSON/XML** data contracts and SQL-backed persistence.
- Containerised services with **Docker** and simulated **1000+ end-to-end transactions** to test application correctness, throughput, and integration behavior under load.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
