Sanskar Jain

.NET Software Engineer | ASP.NET MVC | C# | SQL Server | Web Applications
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

C# and .NET software engineer with 2+ years building and maintaining production-grade web applications and REST APIs using **ASP.NET Core MVC**, **SQL** databases, and **JSON**-based integrations at Verisk Analytics. Experienced in writing clean, testable, and maintainable code with active participation in **peer code reviews**, technical documentation, and Agile delivery. Hands-on in handling production environments, diagnosing live issues, and shipping reliable features end-to-end.

Skills

Languages & Web: C#, JavaScript, TypeScript, HTML/CSS, JSON, AJAX, jQuery, Bootstrap
Frameworks & Platforms: .NET 8, ASP.NET Core MVC, Web API, REST APIs, Microservices, Kafka, Redis
Databases: SQL Server, PostgreSQL, MySQL, MongoDB, T-SQL, Stored Procedures, Database Design
Dev Tools: Visual Studio, Azure DevOps (TFS), Git, Bitbucket, Swagger, Postman, Docker
Practices: Agile/Scrum, Peer Code Reviews, Technical Documentation, Production Support, CI/CD

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Designed and delivered **ASP.NET Core MVC** REST APIs handling **200K+ weekly requests**, with structured error handling, input validation, **JSON** contract design, and **Swagger**-documented technical specifications ensuring clear API ownership.
- Built **RulesRunner**, a decoupled server-side microservice that offloaded compliance logic from the client layer, reducing wait time from **3000ms to 500ms** (**83%**) by applying clean, testable **C#** design patterns and async processing.
- Engineered a scalable import/export backend for **Xactimate** supporting **30+ data types** using async **C#**, **SQL**-backed data pipelines, and AWS S3; reduced data transfer time by **38%** and user-reported production issues by **25%**.
- Resolved and triaged **production environment** issues in real time using **Splunk** dashboards with structured logging, reducing mean time to diagnose incidents and surfacing latency spikes and pipeline failures across services.
- Conducted active **peer code reviews** and maintained **reference documentation** and API contracts, enforcing best practices for clean, readable, and maintainable **.NET** codebases across the engineering team.
- Reduced technical debt by **55%** and improved runtime performance by **30%** through migrating legacy services to **.NET 8**, modernising dependency injection, async patterns, and **Visual Studio** SDK tooling.
- Overhauled **CI/CD pipelines** in **Azure DevOps (TFS)** with staged gates, parallel jobs, and automated test integration, cutting deployment time by **50%** and enforcing **Agile** delivery standards across the team.
- Improved **API response time by 34%** via **Redis** caching, connection pooling, and targeted **SQL query optimisation** on hot-path database endpoints, demonstrating strong database design and query-writing skills.
- Eliminated message loss by designing **AWS SNS**/Lambda pipelines with idempotent processing and retry/backoff handling; accelerated build and test cycle by **33%**, shipping **10+ features per quarter**.

Projects

Expense Tracker – Full-Stack Web Application Aug 2023 – Dec 2023
C#, Spring Boot, TypeScript, JavaScript, Docker, Kong API Gateway, SQL

- Built a full-stack web application with **5+ microservices**, **JavaScript/TypeScript** UI layer consuming **REST/JSON** APIs, and **SQL**-backed persistence; containerised with **Docker**, cutting environment setup by **60%**.
- Integrated **Kong API Gateway** for routing, load balancing, and auth; adhered to **software design best practices** and simulated **1000+ end-to-end transactions** to validate correctness and maintainability.
- Authored **technical specifications** and reference documentation covering data models, API contracts, and service interactions — practising structured software design documentation aligned with team standards.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
