Sanskar Jain

Hyderabad, Telangana, India
9021620156 — sanskarjain0901@gmail.com — LinkedIn

Summary

Software engineer with 2+ years of hands-on experience building cloud-native microservices and full-stack applications at Verisk Analytics. Core strengths in REST API design, event-driven architecture, AWS services (Lambda, S3, SQS/SNS), and modern CI/CD pipelines. Proven track record of delivering measurable impact across cross-functional teams, with growing experience applying AI and ML solutions to real engineering problems.

Skills

Languages: C#, Java, Python, TypeScript, JavaScript
Frontend: React, HTML5, CSS3
Backend: .NET 8, ASP.NET Core, Spring Boot, REST APIs, Microservices, Domain-Driven Design, Kafka
Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, EKS, ECS, ElastiCache), Docker, Kubernetes, Terraform, CI/CD
Databases: MongoDB, PostgreSQL, MySQL, DynamoDB (NoSQL), Elasticsearch, Indexing & Query Optimisation
Testing & Tools: xUnit, NUnit, Jest, Azure DevOps, Swagger/OpenAPI, OpenTelemetry, Splunk, Jira
Security: OAuth 2.0, JWT, Okta, Kong Gateway

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Designed **RulesRunner**, a stateless microservice following **domain-driven design** and **CQRS** principles on **AWS SQS**, decoupling compliance processing from client threads and reducing wait time from **3000ms to 500ms (83%)**.
- Architected fault-tolerant event-driven pipelines using **AWS Lambda**, **SNS**, and **S3** with idempotent processing and retry/backoff strategies, ensuring zero message loss across distributed workflows under failure conditions.
- Built **ASP.NET Core** REST APIs handling **200K+ weekly requests** with structured error handling, input validation, versioning, and **OpenAPI/Swagger** contracts aligned to microservices architectural patterns.
- Established **OAuth 2.0** authentication on **AWS EKS** behind **Kong Gateway**, integrating **Okta JWT** tokens for secure, standards-compliant cross-service authorisation.
- Improved hot-path API response time by **34%** using **Redis/ElastiCache** caching with deliberate TTL invalidation strategies and **NoSQL** query optimisation on **MongoDB**.
- Integrated **Elasticsearch** to power project discovery with multi-filter search across attributes such as category, status, and tags, replacing slow database scans and significantly improving search responsiveness for end users.
- Overhauled **Azure DevOps** CI/CD pipelines with staged gates, parallel jobs, and automated testing, cutting deployment time by **50%** and build cycles by **33%**.
- Migrated legacy services to **.NET 8** with modern async patterns, reducing technical debt by **55%** and improving runtime performance by **30%** while maintaining full backward compatibility.
- Authored **infrastructure-as-code** configurations and production-safe migration scripts with idempotent operations enabling zero-downtime deployments on **Kubernetes**-managed clusters.
- Instrumented services with **OpenTelemetry** distributed tracing and **Splunk** dashboards, reducing mean time to diagnose incidents; collaborated cross-functionally with product and QA teams in Agile sprints.

Projects

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023

- Built a full-stack expense management application with a **React** frontend and **5+ Spring Boot** microservices communicating asynchronously via **Kafka**; routed all traffic through **Kong API Gateway** for auth and load balancing.
- Containerised all services with **Docker** and orchestrated deployments on **Kubernetes**; wrote end-to-end tests with **Jest** and integration tests simulating **1000+** transactions to validate reliability under load.

Stock Recommendation and Prediction – AI/ML Application Apr 2022 – Jun 2022

- Designed and trained **LSTM**-based time-series models in **Python** for 30-day stock price forecasting, integrating ML inference into a REST API-backed advisory platform demonstrating hands-on experience with AI/ML data pipelines.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
