Sanskar Jain

Backend Engineer — Java — Kubernetes — Distributed Microservices
Hyderabad, Telangana, India
9021620156 — sanskarjain0901@gmail.com — LinkedIn

Summary

Backend Engineer with 2+ years designing, deploying, and operating **Java/Spring Boot** microservices in a distributed, cloud-native environment at Verisk Analytics. Hands-on with **Kubernetes**, **Docker**, and **AWS** (EKS, ECS, Lambda, S3, SNS, SQS) for containerized deployment, event-driven pipelines, and horizontal scaling. Operationally strong: owns monitoring (**Splunk**, **OpenTelemetry**), automated testing (**JUnit/xUnit**), and CI/CD, balancing new feature delivery with tech debt reduction. Clear communicator who documents API contracts and design decisions for cross-team collaboration in Agile/Scrum teams.

Skills

Languages: Java 17, C#, Python
Backend & Distributed Systems: Spring Boot, REST APIs, Microservices, Event-Driven Architecture, Kafka, CQRS, API Versioning
Cloud & Containers: AWS (EKS, ECS, S3, SNS, SQS, Lambda, ElastiCache), Kubernetes, Docker, Terraform, CI/CD (Azure DevOps)
Operational Excellence: Monitoring (Splunk, OpenTelemetry), Testing (JUnit, xUnit/NUnit), Swagger/OpenAPI, Incident Diagnosis
Databases: MongoDB, PostgreSQL, MySQL, Firebase, Query Optimization & Indexing
Security: OAuth 2.0, JWT, Okta, Kong Gateway

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II, Hyderabad, India

- Co-designed **RulesRunner**, a **Java/Spring Boot** microservice using **CQRS** and **SQS** that offloaded compliance checks from the client in a distributed multi-service environment, reducing wait time from **3000ms to 500ms (83%)** while enabling horizontal scaling.
- Deployed and operated services on **AWS EKS** (**Kubernetes**) behind **Kong Gateway**, containerising with **Docker** and integrating **OAuth 2.0/Okta JWT** for secure cross-service authorization at scale.
- Authored technical design docs defining service boundaries, API contracts, DLQ handling, and **SNS**-based event publishing patterns for distributed consumers, reviewed with cross-functional engineering teams.
- Engineered a scalable **Java/Spring Boot** backend for **Xactimate's** import/export of **30+ data types** using async processing, **S3** presigned URLs, and **MongoDB**, reducing transfer time by **38%** and issues by **25%**.
- Built **REST APIs** handling **200K+ weekly requests** with structured error handling, input validation, and **Swagger/OpenAPI** documentation; implemented URL-based API versioning for backward compatibility.
- Instrumented microservices with **OpenTelemetry** tracing and **Splunk** dashboards for operational monitoring, cutting mean time to diagnose production incidents.
- Improved API response time by **34%** via **Redis**/ElastiCache caching and query/index optimisation on **MongoDB** and **PostgreSQL** hot-path endpoints.
- Overhauled **Azure DevOps** CI/CD pipelines with staged gates, automated testing, and parallel jobs, cutting deployment time by **50%** and build cycles by **33%** while balancing feature work with tech-debt cleanup.
- Wrote unit/integration tests with **xUnit/NUnit**, achieving strong coverage; participated in structured code reviews covering architecture, edge cases, and production readiness.

Projects

Expense Tracker – Java Spring Boot Microservices Aug 2023 – Dec 2023

- Built expense tracker using **Spring Boot** with **5+ microservices** in a distributed setup, async **Kafka** communication, and **Kong API Gateway** for routing and auth.
- Containerised all services with **Docker** and orchestrated deployments using **Kubernetes**; simulated **1000+ transactions** end-to-end for load testing.

Stock Recommendation and Prediction Platform Apr 2022 – Jun 2022

- Built a stock advisory platform in **Python** using LSTM models for 30-day predictions; integrated Yahoo Finance API and **Firebase** for real-time data storage, deployed via Streamlit.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services — Oct 2024

Education

B.Tech in Computer Engineering – Vishwakarma Institute of Technology, Pune 2024 — CGPA: 8.8
