Sanskar Jain

.NET Software Engineer | C# | ASP.NET MVC | Entity Framework | LINQ
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

C# and .NET software engineer with 2+ years developing, testing, and troubleshooting production multi-layer web applications at Verisk Analytics. Experienced with **ASP.NET MVC**, **.NET Core**, **Entity Framework**, **LINQ**, and **SQL Server**, plus JavaScript-based client development and secure REST integrations. Proven in performance tuning, independent feature ownership, technical communication, and collaborative delivery within Agile/Scrum teams.

Skills

Languages & Web: C#, JavaScript, HTML, CSS, jQuery, AJAX, JSON, XML, LINQ
Frameworks: .NET 8, .NET Core, ASP.NET, ASP.NET MVC, Web API, REST APIs, Microservices
Data & ORM: Entity Framework (EF Core / EF6), SQL Server, T-SQL, PostgreSQL, MySQL, MongoDB, RDBMS Concepts
Security & Testing: OWASP Mitigations, OAuth 2.0, JWT, Input Validation, NUnit, xUnit, Moq, Unit/Integration Testing
Tools & Practices: Visual Studio, Azure DevOps (VSTS), Git, Swagger/OpenAPI, Splunk, CI/CD, Agile/Scrum, Code Reviews

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Delivered **ASP.NET MVC/Web API** services processing **200K+ weekly requests**, applying multi-layer design, input validation, structured error handling, and documented JSON contracts.
- Modelled relational data with **Entity Framework (EF Core)** and **SQL Server**, composing strongly typed **LINQ** queries for filtering, joins, projections, and asynchronous data access.
- Tuned **LINQ-to-Entities** queries, database indexes, and **T-SQL** access patterns on high-traffic endpoints, improving API response time by **34%**.
- Designed **RulesRunner**, an asynchronous microservice that moved compliance processing out of the client workflow and reduced wait time from **3000ms to 500ms** (**83%**).
- Engineered the **Xactimate** import/export backend for **30+ data types** using async C#, REST integrations, and persistent data pipelines, reducing transfer time by **38%** and production issues by **25%**.
- Secured web applications using **OAuth 2.0**, JWT validation, authorization controls, and OWASP-aligned input handling to mitigate injection and unauthorized-access risks.
- Created unit and integration tests with **NUnit**, **xUnit**, and **Moq**, isolating application layers and protecting critical business logic from release regressions.
- Modernised legacy **ASP.NET** services to **.NET 8**, improving runtime performance by **30%** and reducing technical debt by **55%** through dependency injection and async patterns.
- Overhauled **Azure DevOps/VSTS** pipelines with staged gates, parallel jobs, and automated testing, cutting deployment time by **50%** and build cycles by **33%**.
- Authored technical designs and participated in peer reviews covering architecture, edge cases, security, and production readiness while contributing within an **Agile/Scrum** team.

Projects

Expense Tracker – Full-Stack Web Application Aug 2023 – Dec 2023
Java, Spring Boot, JavaScript, HTML/CSS, SQL, Docker

- Built an HTML/CSS and **JavaScript** client for **5+ microservices**, integrating REST/JSON endpoints and SQL-backed persistence through a gateway-managed application architecture.
- Containerised services with **Docker** and simulated **1000+ end-to-end transactions** to validate functionality, integration behavior, and throughput under load.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
