Sanskar Jain

Full-Stack Engineer | C# / .NET | Agentic AI | LLM Integrations
Hyderabad, India | 9021620156 | sanskarjain0901@gmail.com | LinkedIn

Summary

Full-stack software engineer with 2+ years building **C#/.NET** (ASP.NET Core) REST APIs and microservices, plus hands-on experience developing **LLM-powered internal agents** using the **OpenAI API**, prompt engineering, and custom agent orchestration at Verisk Analytics. Comfortable across the full stack — relational/**NoSQL** databases, JavaScript/HTML/CSS front-ends, and unit-tested, Agile-delivered backend services — with strong interest in applying Generative AI to real business workflows.

Skills

Agentic AI & GenAI: OpenAI API, Prompt Engineering, Context Management, Agent/Workflow Orchestration, LLM Integration Patterns
Languages & Web: C#, JavaScript, TypeScript, HTML5, CSS3, JSON, Python
Frameworks & Platforms: .NET 8, ASP.NET Core, ASP.NET MVC, Web API, REST APIs, Microservices, Kafka, Redis
Databases: SQL Server, MySQL, PostgreSQL, MongoDB (NoSQL), Query Optimization, Database Design
Testing & Tools: xUnit, NUnit, Git, Azure DevOps, Swagger/OpenAPI, Postman, Docker
Practices: Agile/Scrum, RESTful API Design, Code Reviews, CI/CD, Technical Documentation

Experience

Verisk Analytics Jan 2024 – Present
Software Engineer II Hyderabad, India

- Built **LLM-powered internal workflow agents** using the **OpenAI API**, integrating prompt-driven automation for **Jira ticket creation** and task routing, reducing manual coordination effort and speeding up execution across teams.
- Designed **prompt templates and context-passing logic** to reliably map business rules and validation checks into agent-driven actions, connecting LLM outputs with backend services via structured **REST/JSON** contracts.
- Built **ASP.NET Core Web API** endpoints handling **200K+ weekly requests**, with structured error handling, input validation, and **Swagger/OpenAPI** documentation across a full-stack **C#/.NET** application.
- Co-designed **RulesRunner**, a stateless **C#** microservice using **CQRS** and SQS, reducing client wait time from **3000ms to 500ms (83%)** and enabling horizontal scaling for compliance workloads.
- Engineered a scalable import/export backend for **Xactimate** across **30+ data types** using async **C#** pipelines, **MongoDB** (NoSQL), and **SQL**-backed storage, cutting transfer time by **38%** and issues by **25%**.
- Improved **API response time by 34%** via **Redis** caching and **SQL query optimization**; wrote **xUnit/NUnit** unit and integration tests and participated in structured **code reviews** across the team.
- Overhauled **Azure DevOps CI/CD** pipelines with staged gates and parallel jobs, cutting deployment time by **50%** and build cycles by **33%** within an **Agile** delivery model.
- Reduced technical debt by **55%** and improved runtime performance by **30%** by migrating legacy services to **.NET 8**, staying current with modern async patterns and new tooling.

Projects

Internal Workflow Automation Agent 2025 – 2026
OpenAI API, C#/Python, Prompt Engineering, Jira, REST APIs

- Built an **LLM-based agent** that parses task requests and drafts/creates **Jira tickets** via prompt-engineered calls to the **OpenAI API**, with custom orchestration logic for context management and input validation.
- Connected agent output to downstream backend services and business rules, reducing repetitive manual coordination and improving turnaround time for operational requests.

Expense Tracker – Full-Stack Microservices Application Aug 2023 – Dec 2023
C#, Spring Boot, JavaScript, HTML/CSS, Kafka, SQL/NoSQL

- Built **5+ microservices** with async **Kafka** messaging, a **JavaScript**/HTML/CSS UI layer consuming **REST/JSON** APIs, and **relational and NoSQL** data persistence, containerised with **Docker**.

Certifications

AWS Certified Cloud Practitioner Amazon Web Services | Oct 2024

Education

B.Tech in Computer Engineering — Vishwakarma Institute of Technology, Pune (SPPU) 2024 | CGPA: 8.8
